Full product description

TP-Link Deco AC1200 - for building Mesh Wi-Fi home network

TP-Link Deco M4 AC1200 is a system of devices for constructing a home **Mesh WiFi**. Deco is the easiest way to get a **strong wireless signal in every corner of your home**. Two Deco units cover an area up to **260 m²**. Wireless and optional Ethernet backup connectivity connects the Deco units, providing an even faster network and the **smoothest roaming**, which offers the best connection covering the entirety of your home, without interrupting the transfer. Wondering how to get **greater Wi-Fi coverage**? Just add another Deco unit.

Three in one - router, access point and network amplifier

Multifunctional Deco M4 device can be used as **router**, **access point** and **network amplifier**. Instantly create a private wireless network or create **Wi-Fi** access for all wired networks in your home. Select the optimal mode in real time and enjoy maximum network flexibility.

Say goodbye to buffering

With **802.11ac** technology and high speeds, **three times faster** than older generations of routers, Deco can provide **fast connection** without delay, even for **100 devices**.

No More Buffering

connections for up to

100

devices

5 GHz ————— 867 Mbps

2.4 GHz ————— 300 Mbps

No more Wi-Fi dead zones

Eliminate **dead zones** throughout your home with Wi-Fi with **smooth roaming**, **adaptive routing** and **automatic connection repair**. You will never have to look for wireless signal again, no matter where you are - in the basement, garage or backyard. **TP-Link Mesh** technology dynamically selects the best possible route and bandwidth for your data, ensuring a fast connection in every corner of the house.

Tasteful design

TP-Link has made sure that Deco M4, as befits a new generation device, has a very attractive, minimalist design. The devices look beautiful on a desk, shelf and in any other place.
