Full product description

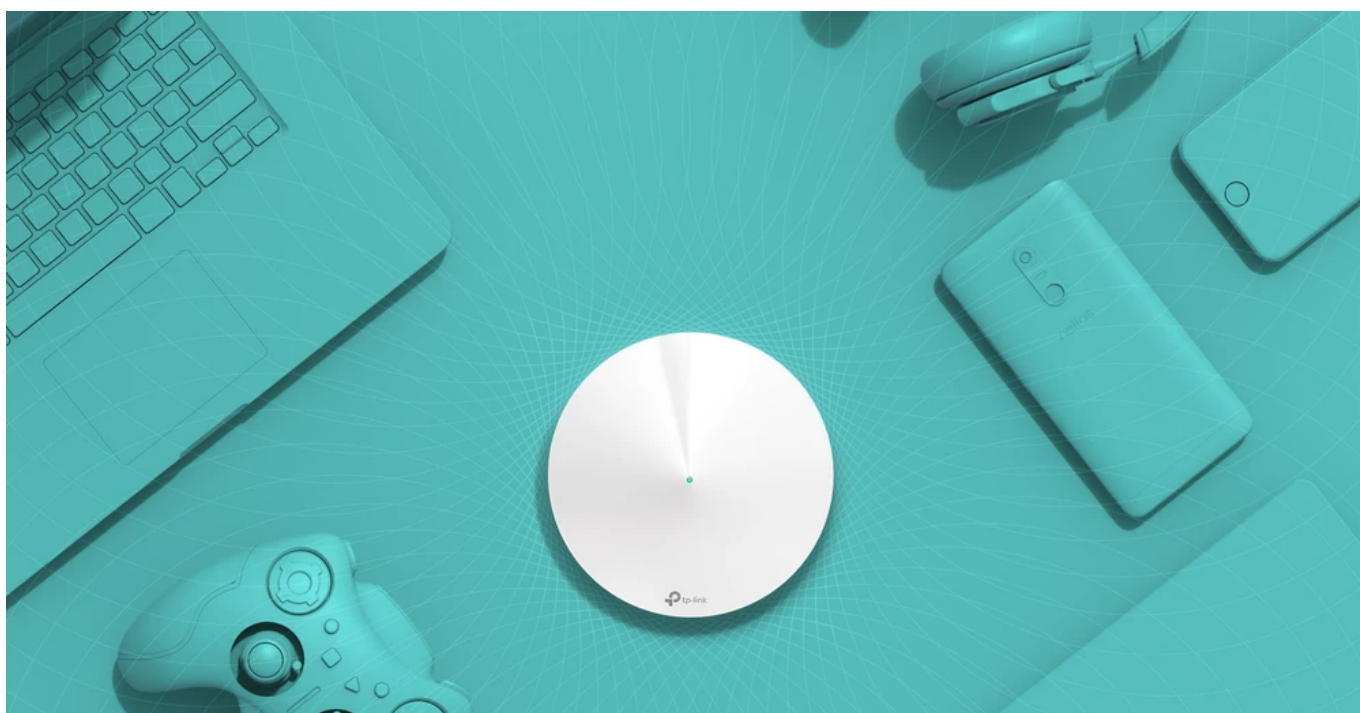

TP-Link Deco M5 - Mesh Wi-Fi system for your home (set includes 3 devices)

TP-Link Deco M5 is the easiest way to get a strong wireless signal in every corner of your home. The presented set includes three devices. Enjoy a fast and stable connection for all devices over an area as big as **500 m²**. The device operates at two frequencies: 2.4 GHz and 5 GHz. It offers a stable connection with a speed up to 1267 Mbps. Eliminate the **Wi-Fi dead zones** in your home with Deco system and you will never have to look for network coverage again. Need more coverage? Just add another Deco unit. This is the perfect choice for anyone looking for the answer to the question: **how to cover a large home with WiFi?**

No more loading

You're tired of loading all the time? With **802.11ac** technology and speeds up to three times faster than older generations of routers, Deco M5 can guarantee a fast connection, without delays, even **for a 100 devices**.

Enjoy Wi-Fi like never before!

Eliminate dead zones throughout your home with Wi-Fi with **smooth roaming**, **adaptive routing** and **automatic call repair**. Never again will you have to look for a wireless signal, no matter where you are - in the basement, garage or backyard. **TP-Link Mesh** technology dynamically selects the best route and bandwidth for your data, **ensuring a fast connection** in every corner of the house.

Deco M5 home Wi-Fi system - fast, stable, everywhere.

- Deco uses several devices to create a single Wi-Fi network. Weak signals and dead zones are a thing of the past!
- Thanks to advanced Mesh technology, devices will switch automatically as they move around throughout the house.
- Three Deco M5 devices are enough to cover a house of up to 500m². If you need even more coverage, you can always connect additional Deco routers.
- Deco M5 offers a stable connection with speeds up to 1267 Mbps and is compatible with all cable modems.
- Deco system can handle up to 100 wireless devices on the network.
- TP-Link HomeCare™ provides network security, parental control and QoS function.
- Thanks to Deco application, system configuration is trivially simple.
