Full product description

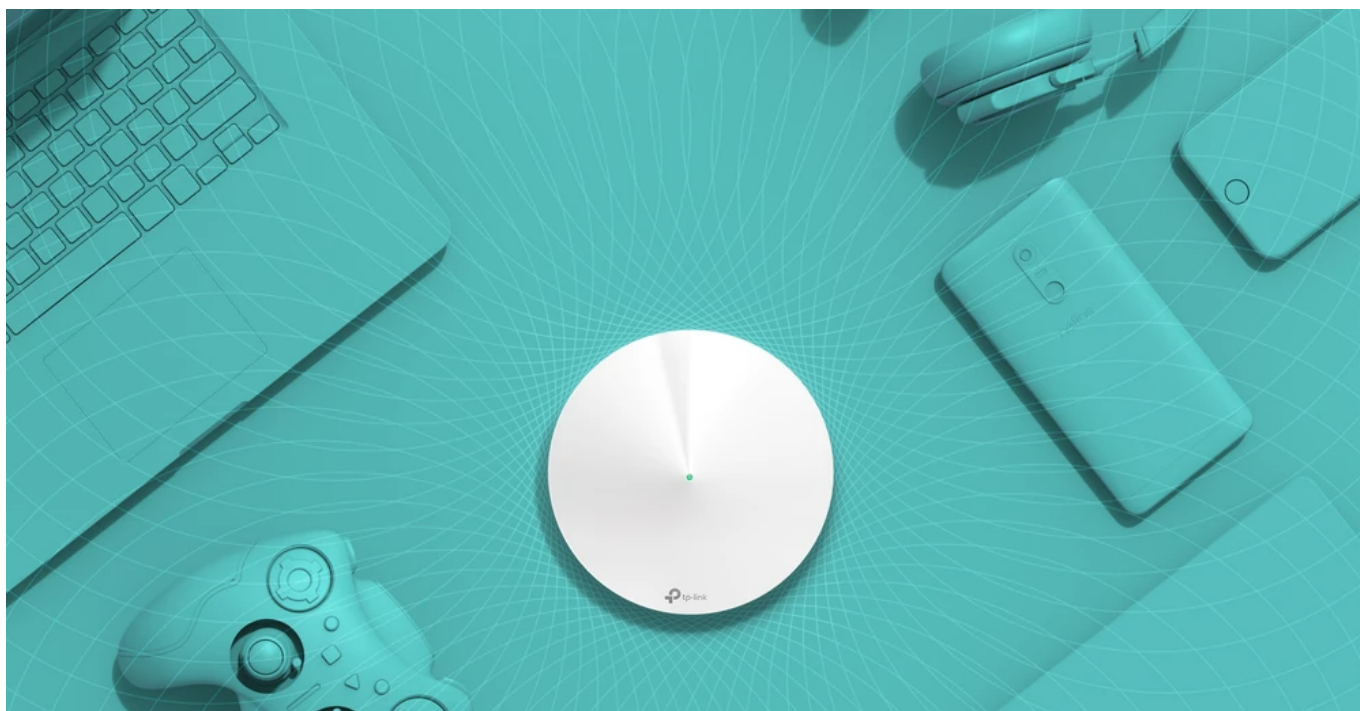

Cover the whole household with a WiFi signal

With the brilliant TP-Link Deco M9 Plus Smart Home WiFi mesh system, you can have a strong WiFi signal throughout the house - you won't have to look for a place with an optimal signal anymore. The package includes two Deco M9 units which, thanks to the advanced **Deco Mesh technology, create one complete network with one name in your home or apartment.** Your device always connects to the one that provides the best and strongest signal. This basic version with two modules covers an area of up to 600 m2. If necessary, you can buy additional Deco units.

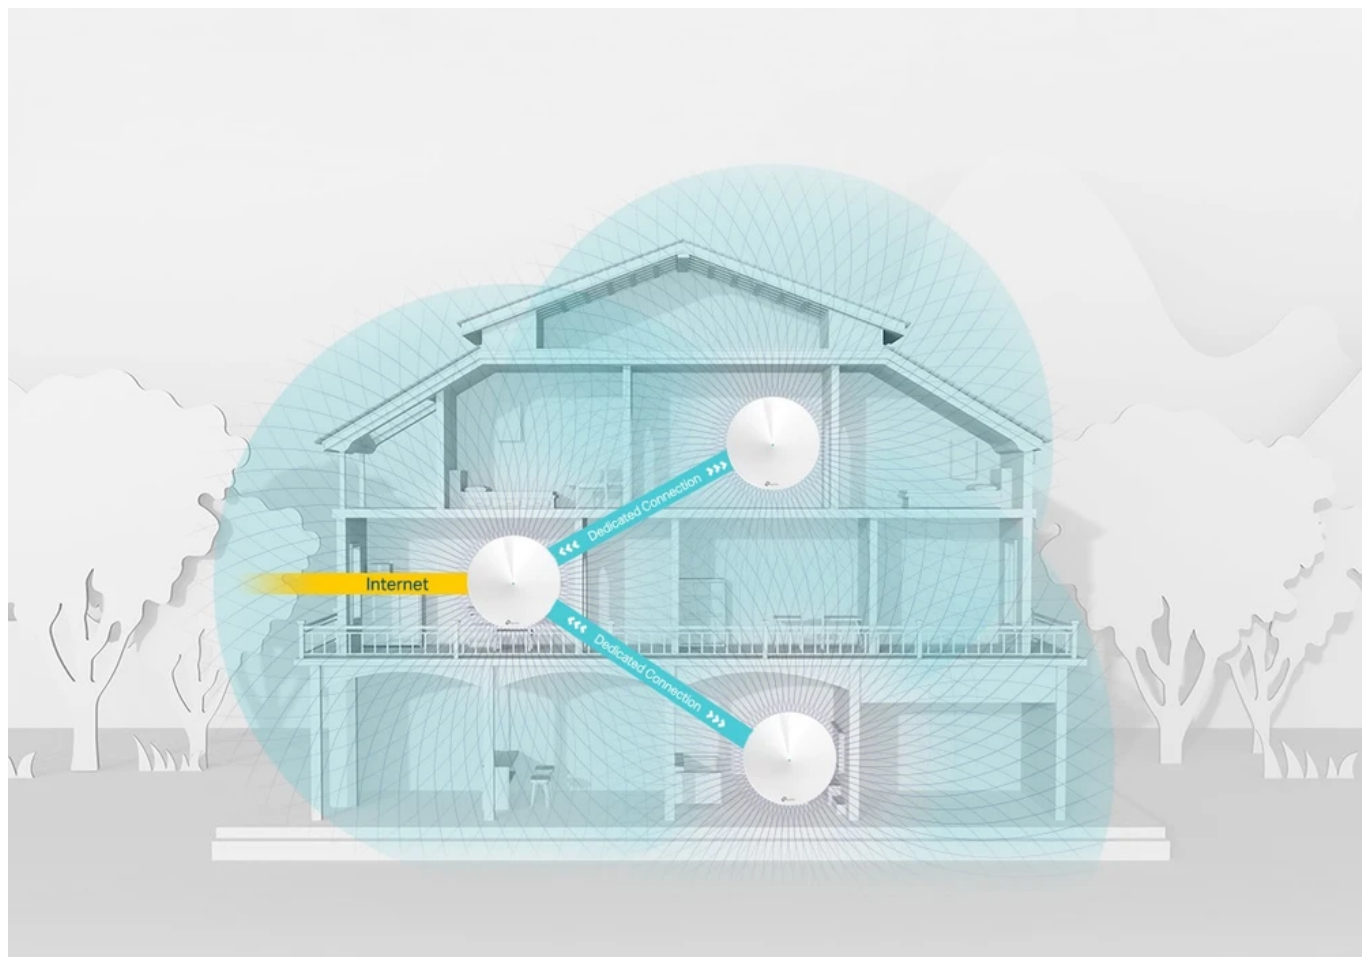

Fast connection of up to 100 devices at a time

Deco M9 Plus Smart Home operates on three separate bands, providing a fast and **stable connection with a total speed of up to 2134 Mbps**. In general, this system acts as a hub to connect all the devices in your smart home, plus it allows you to customize settings and create mutual interactions. Deco M9 system from TP-Link ensures stable connection of up to 100 devices simultaneously.

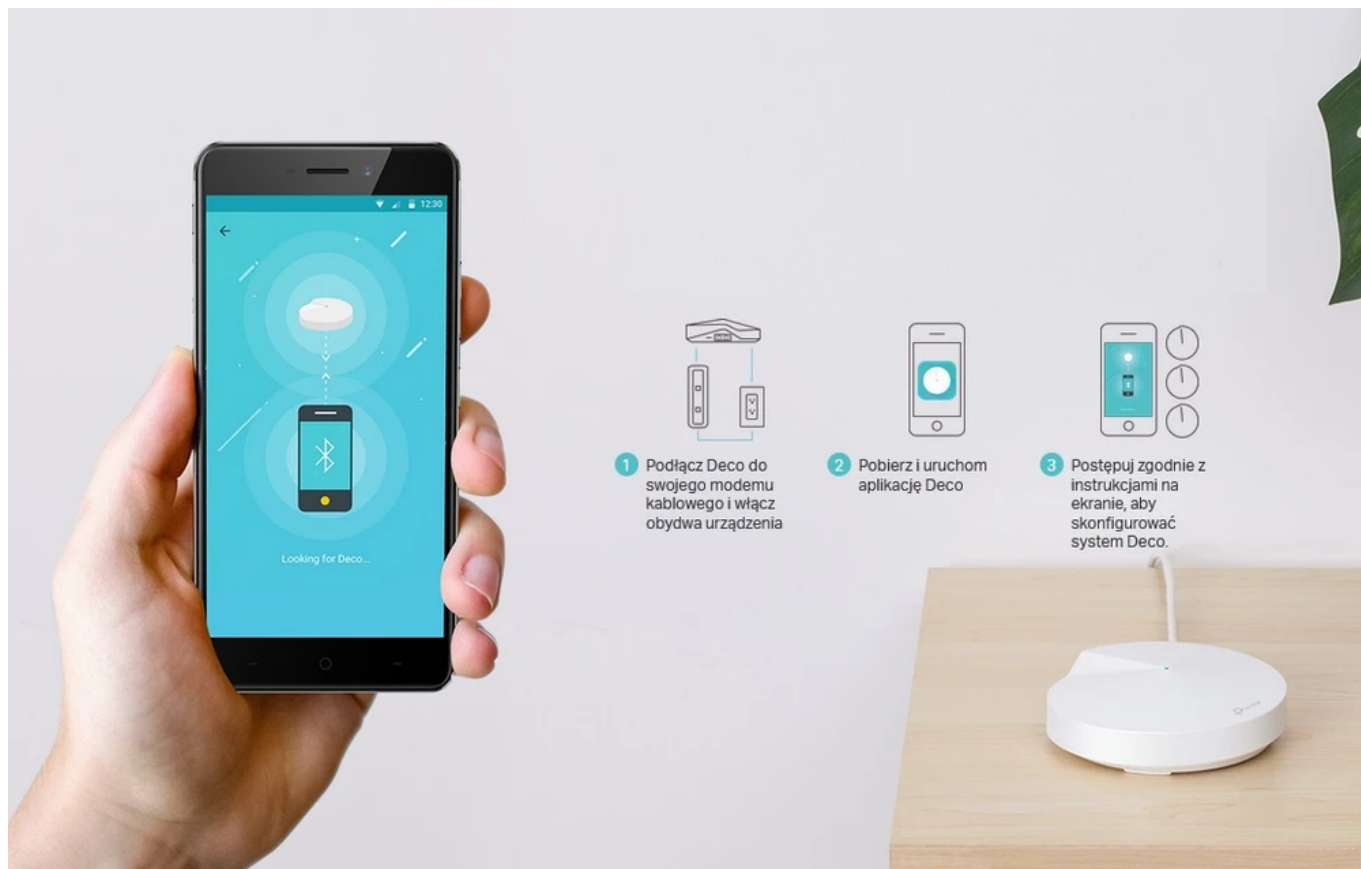

Smooth transition between different zones

The Wi-Fi signal range with **Deco M9 Plus** eliminates weak spots throughout the house. You won't have to run around looking for a place where the signal will be stable. You can enjoy the benefits of a wireless connection not only in the living room, but throughout the house.

Configuration is now even easier

Unpack the Deco units, install the applications, and then follow the on-screen instructions. Deco will take care of everything else, and your network will be set up and functional in no time.

Key features of TP-LINK Deco M9 Plus WiFi System

1. **Two Deco units in the package are sufficient to cover 600 m2**
2. Three bands with speeds up to 2134 Mbps
3. Completely eliminates weak spots
4. Supports intelligent ZigBee, Bluetooth and WiFi devices from TP-Link, GE, Kwikset and other leading brands
