Full product description

Modern Wi-Fi Standard 6

The **TP-Link Deco X20-DSL** supports the modern **IEEE 802.11ax standard**, also known as **Wi-Fi 6**, which provides unparalleled connection speed and stability. The device supports the full list of protocols: **IEEE 802.11 b/g/n/ax (2.4 GHz)** and **IEEE 802.11 a/n/ac/ax (5 GHz)**. Maximum theoretical **WiFi** throughput is as high as **1,800 Mbps - 574 Mbps** in the **2.4 GHz** band and **1,210 Mbps in 5 GHz**. With **Wi-Fi 6**, you also gain access to advanced features such as **MU-MIMO** (simultaneous transmission and reception of data from multiple clients), **Beamforming (beamforming)** to improve coverage) and **WPA3**, the latest data encryption standard.

Built-in DSL Modem

TP-Link Deco X20-DSL has a built-in **DSL** modem that supports **ADSL**, **ADSL2**, **ADSL2** and **VDSL2** transmissions . With support for new profiles, you can take advantage of a high-bandwidth connection using **VDSL2** profile **35b up to 350 Mbps**. The router is also equipped with four gigabit Ethernet ports that can serve as both WAN and LAN. A maximum of one WAN port can be used, allowing **the X20-DSL** to also connect to a regular network if you are no longer using **DSL** services.
