The **TP-Link EAP235-Wall** Access Point provides a stable and fast connection to every wireless device in the vicinity. This device uses the new

802.11ac standard with Wave 2 MU-MIMO, which makes it able to reach transmission speed of even up to 1167 MB/s. EAP235-Wall transmits data in two frequency bands (2,4 GHz i 5 GHz) and its efficiency is optimized with the **Beamforming** technology. 

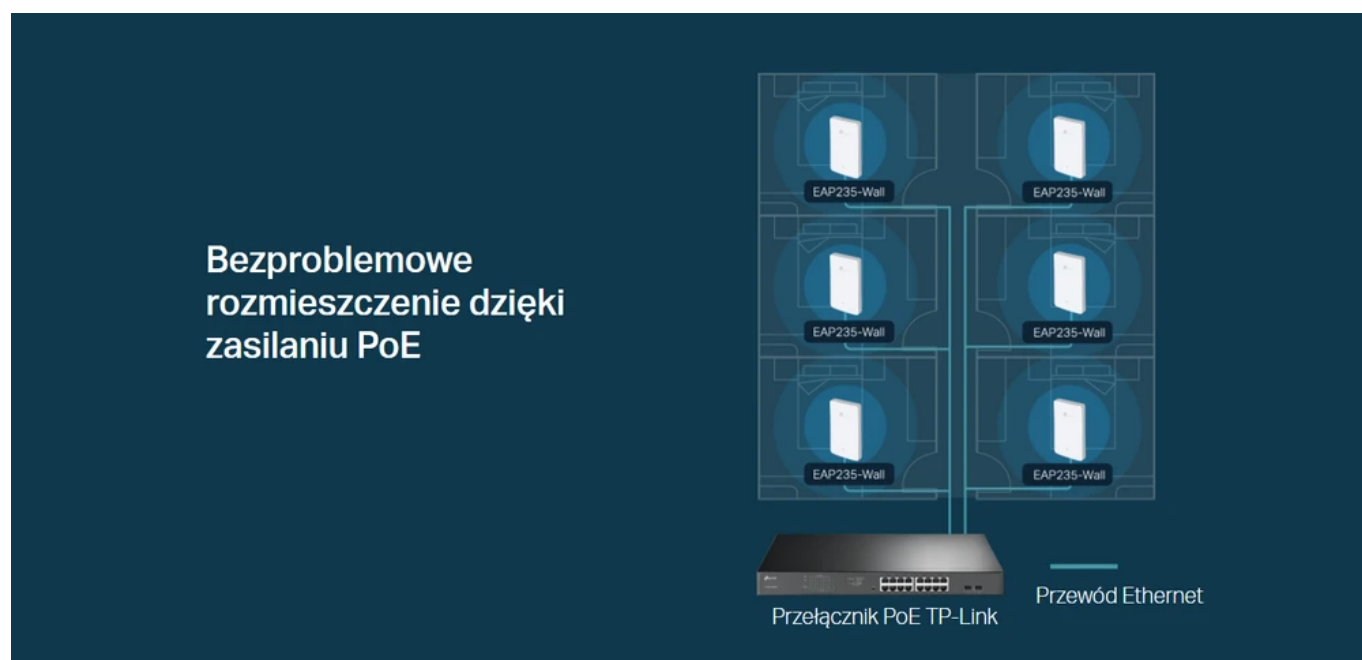

Omada SDN

The TP-Link EAP235-Wall is compatible with **Omada SDN**, an intelligent cloud solution for enterprise networking . This platform integrates network devices, including access points, switches and gateways, guaranteeing a powerful business network with higher performance, higher security and higher reliability.

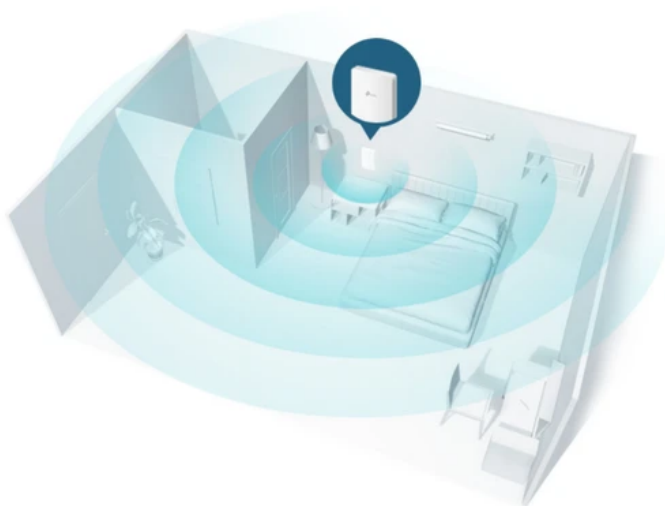

Trouble-free deployment thanks to PoE power supply

With support for **Power over Ethernet 802.3af / 802.3at** technology, no additional building network installation is required for the device to function. Simply connect existing Ethernet cables to the EAP235-Wall.

MU-MIMO + Dual-Band

802.11ac Wave 2 MU-MIMO technology allows multiple users to access the Internet simultaneously, significantly increasing network speeds. An access point capable of transmitting in **both 2.4GHz and 5GHz wireless bands provides greater device compatibility**.
