### Full product description

#### Wireless Dual Band Router

**TP-Link EC120-F5 AC750** is a **dual-band wireless router** supporting the new generation **802.11ac** wireless standard. The device allows simultaneous broadcast of a wireless network with a speed of **300 Mbps** in the **2.4 GHz** band and **450 Mbps** in the **5 GHz** band. Three external omni-directional antennas provide excellent coverage and networking performance.

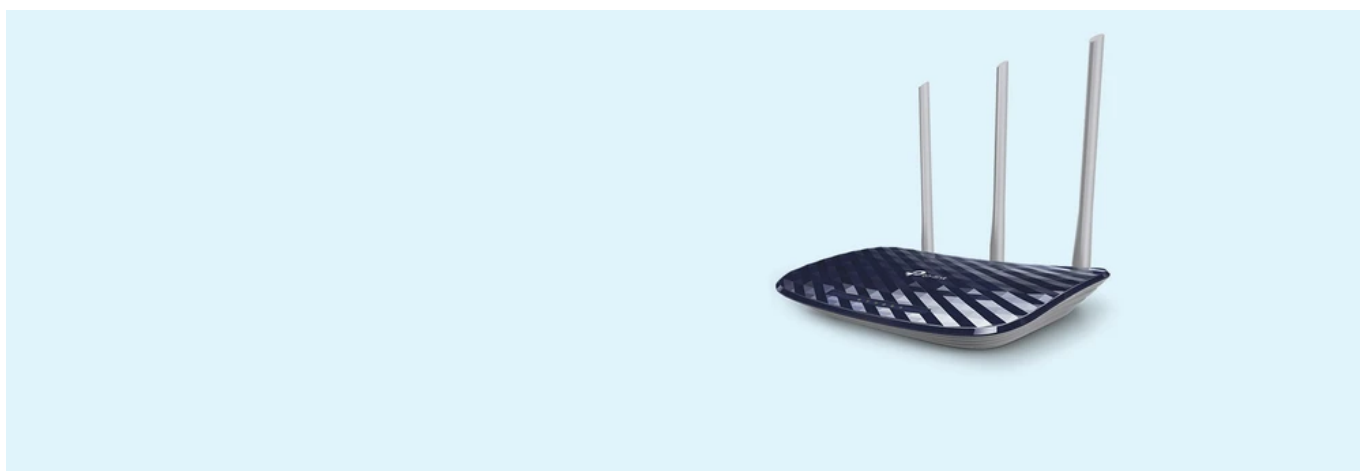

#### The new generation of wireless

Wireless Router **EC120-F5 AC750** by **TP-Link** supports the advanced **802.11ac** standard, increasing speed in comparison with the previously available **802.11n** connections. High performance and security of the router guarantee a fast and reliable home network for multiple devices at the same time.

## 750 Mbps - smooth operation without interference

The **EC120-F5 AC750 Wi-Fi Router** broadcasts two separate wireless networks, one at **433 Mbps** in the **5GHz** band and one at **300 Mbps** in the **2.4GHz** band. This allows you to enjoy two dedicated wireless networks simultaneously. The **2.4 GHz** connection is ideal for everyday, less demanding applications such as email and web browsing, while the **5 GHz** band will be used for more demanding, latency sensitive applications such as HD video streaming or online gaming.

## Simple configuration

An intuitive interface allows for quick and easy router configuration, which can also be done on your smartphone by downloading the intuitive **TP-Link Tether** app available on [Android](#) and [iOS](#) devices.
