Product weight	131.8 g

Full product description

TP-Link HS100 - manage your electrical equipment from anywhere in the world

TP-Link HS100 is a **smart plug** that will allow you to take care of your home device even during your absence. Remote access and control of devices connected to the smart plug is possible with the **Kasa** application from any place where you have access to the Internet. **Smart Plug** allows you to set a schedule to automatically turn on and off your electrical devices according to your preferences. The smart socket has a classic, discreet design that fits virtually any interior.

A safe house under constant control

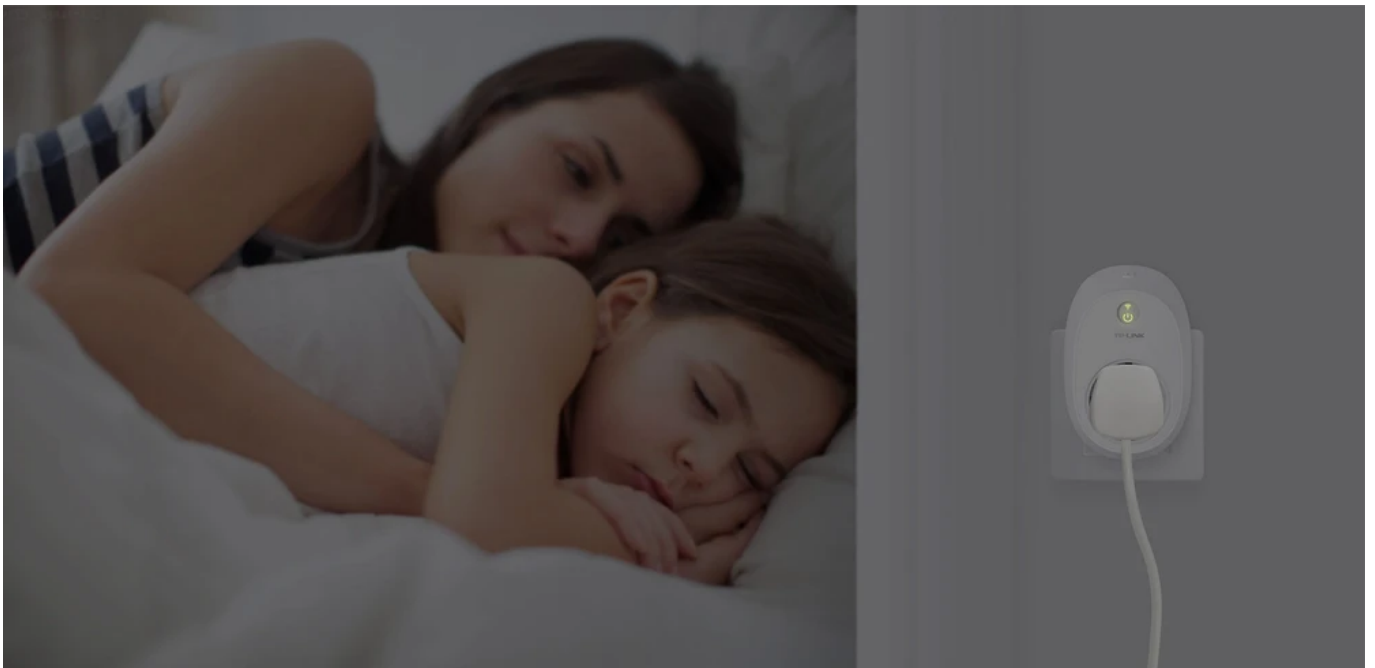

The feeling that your home is safe - priceless. Be careful and clever, during your absence **manage the lighting** so as to discourage potential robbers. What if you forget to turn off the clothes iron? Relax, **Smart Plug will do it for you**. Get rid of unnecessary stress, put on smart solutions and manage your home at a distance.

Be comfortable and manage devices remotely

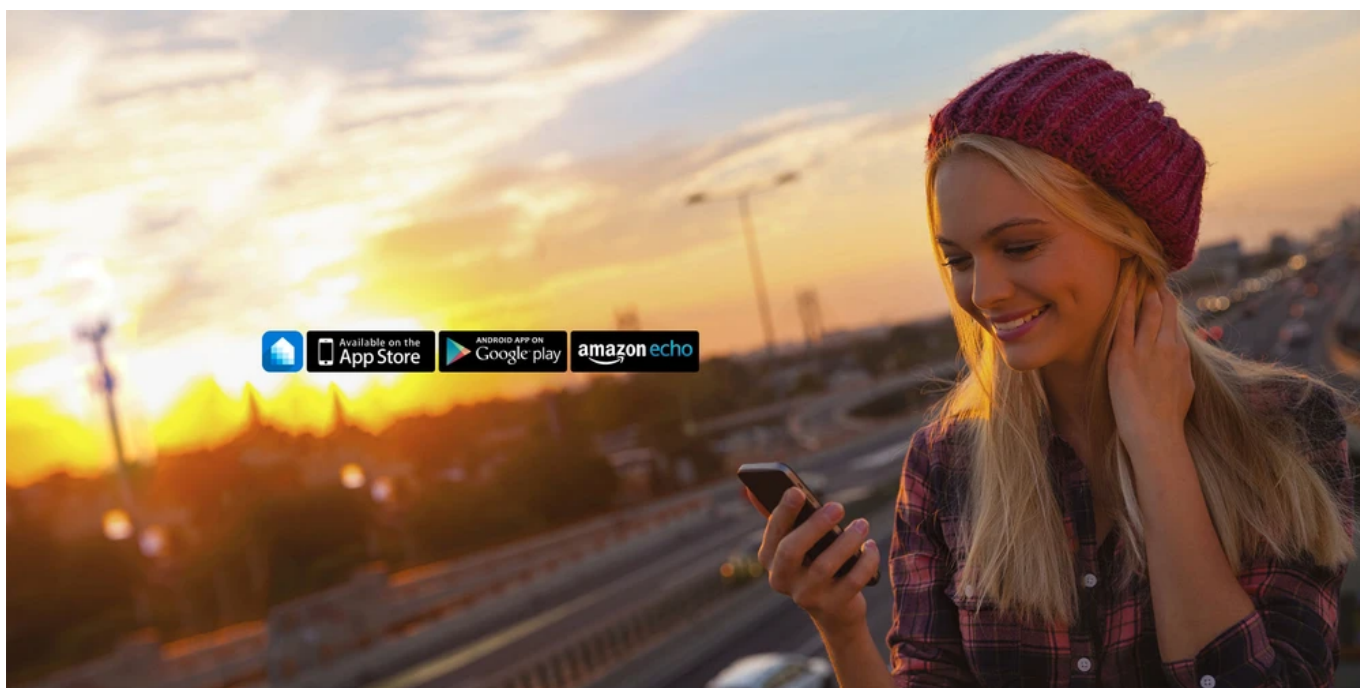

When you want to turn the light on or off, set the automatic switching off at a specific time, check the devices in the living room, you do not have to move, **just a few clicks on your smartphone or tablet** and you're done.

Cooperation with Android, iOS and Amazon Echo device

Connect your smart sockets with **Amazon Echo** to **control the devices by voice**. And the free **Kasa** application allows you to control with a smartphone with [Android \(version 4.1 or later\)](#) or [iOS \(iOS 8 or later\)](#).

A smart socket in your home

- Control your devices connected to the Smart Plug on your smartphone with the Checkout app anywhere you have Internet access.
- Program your smart socket so that it automatically turns on the light when the evening arrives and turns it off when it's clear.
- When you are away from home, use the remote mode to turn your devices on and off at different times to give the impression of your presence at home.
- Amazon Echo (sold separately) allows you to gain control over devices connected to the Smart Plug by voice commands.
