Full product description

Manage your home electronics from anywhere - TP-Link HS110 smart socket

TP-Link HS110 is a **smart WiFi** socket with **energy monitoring**, which will take care of your home appliances even when you are not at home. Connecting your devices to the smart socket using the **Kasa** application enables remote access, management and control of the energy used. **Smart WiFi Plug** allows you to set a schedule to automatically turn on and off your electrical devices according to your preferences. In addition, the device has an elegant design, so that it can easily fit into any environment.

Manage your home equipment with ease wherever you are

Configuration of the device is as easy as using it, just a few clicks on your smartphone and you're done.

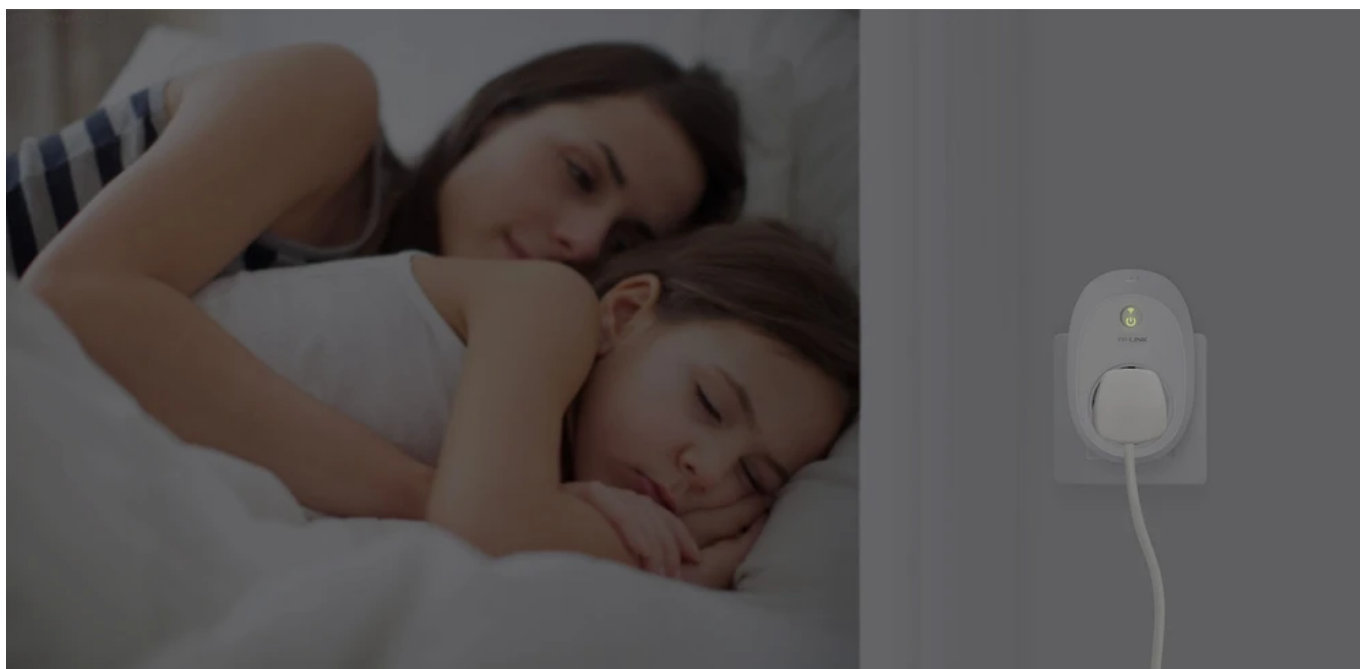

House under constant control

Get some peace and quiet and create the impression of 24-hour presence at home, **controlling the lighting** from your smartphone to discourage potential robbers. In addition, the timer function will turn off devices running at home after a certain amount of time, so you don't have to worry about leaving the clothes iron turned on.

Manage your equipment without going out of bed

You don't even have to leave your bed to turn the lights on or off, control your devices remotely, or set them to turn off automatically after midnight. Just a few clicks on your smartphone or tablet.

Control your energy and your wallet

By using **Smart Plug** you will find out how much energy your radiators and fans consume. Monitor your power consumption in real time and check your weekly or monthly summaries.

Cooperation with Android, iOS and Amazon Echo device

To control your devices with your voice, simply connect your smart sockets to Amazon Echo. The free **Kasa** application will allow you to control and control them using a smartphone with [Android \(version 4.1 or later\)](#) or [iOS \(iOS 8 or later\)](#).
