### Full product description

### Expand Wi-Fi throughout the home

**The RE365 Wi-Fi Signal Booster** connects to your router via Wi-Fi, boosting your signal and extending your coverage to an area of up to 1 square kilometer. Wi-Fi speeds of up to 300Mbps on 2.4GHz and up to 867Mbps on 5GHz will help replace "dead zones" with powerful, high-speed Wi-Fi in any room.

### AC1200 Wi-Fi for reliable connections

Wireless AC technology provides a more reliable Wi-Fi connection throughout the home. Working with any router or access point, the RE365 provides seamless dual-band Wi-Fi for multiple devices simultaneously. In addition, the RE365 has a built-in power outlet with which additional devices can be connected to the network.

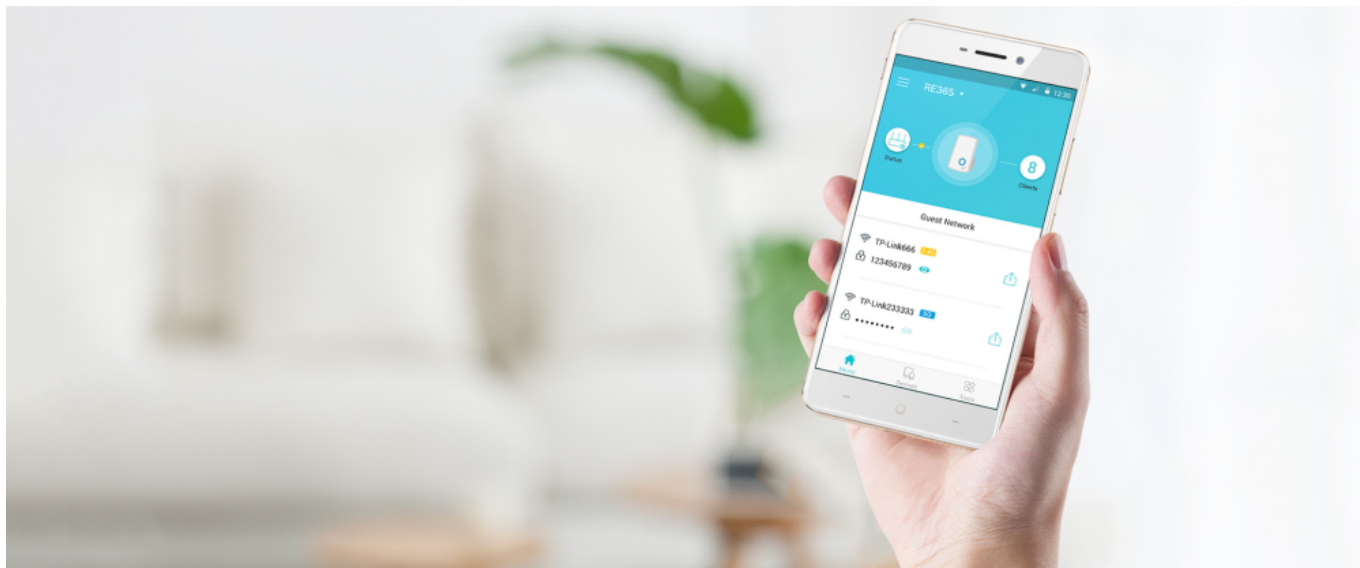

## Intelligent signal indicator

A clever indicator helps you find the **best place** to install the device, and a user-friendly web interface lets you set it up in a minute.

## Mobile application

**Tether** mobile app for network configuration from any iOS or Android smartphone: it allows you to control power, network access, and indicators.

## Design for a modern home

With an arc-shaped design and no sharp edges, the **RE365** is not only stylish, but also safe for children. And the modern design will perfectly complement the high performance.
