Projector brightness	800 ANSI lumens
Product colour	Black
Projection technology	LCD

Full product description

Extralink Vision Max Smart Projector - The perfect choice for movie buffs and

professionals.

The Vision Max delivers incredibly sharp and detailed **Full HD 1080p** images that can be displayed on a screen with **an impressive diagonal of up to 300 inches**, bringing the cinema experience right into our homes. With a durable lamp, flexible **Wi-Fi connectivity options** and **Android 12**, it's the perfect solution for cinema buffs, sports enthusiasts and professionals in need of robust presentation equipment. Its **compact size and modern design** make it fit seamlessly into any interior, while advanced image correction features, such as auto focus and keystone correction, allow you to enjoy a perfect picture from any point in the room.

Key features of the Extralink Vision Max projector

1. **Google Android 12:** Vision Max provides access to the most popular video streaming services from the intuitive Android 12 interface
2. **Versatile Use:** The projector is ideal for a wide variety of situations - from movie nights and shared cheer to large room lectures and business presentations, thanks to the special software installed.
3. **Exceptional Picture Quality:** It offers perfect color reproduction, high brightness and supports Full HD (1080p) resolution for an amazing visual experience even when projecting up to 300 inches.
4. **Long-lasting Performance:** The projector's lamp is designed for thousands of hours of use without loss of performance, which translates into years of continuous, trouble-free use.
5. **Ease of Connectivity:** The projector features Wi-Fi 6 for convenient wireless display, as well as dual USB inputs and an HDMI port for easy interfacing with a variety of image sources.
6. **Ease of Use and Aesthetic Design:** The device is extremely easy to use, allowing you to quickly adjust settings, and its neutral color scheme makes it blend in well with any interior.

Multifunctionality and flexibility with Android 12

The Extralink Vision Max Smart projector is a multi-tasking device, ideal for both watching movies and giving business presentations. Its versatility stems from the pre-installed **Android 12.0** system, which allows you to personalize the projector's functions with various multimedia applications, customizing it for a wide range of needs and circumstances. It is an excellent alternative to regular home TVs, offering a larger image while remaining compact.

Superior image quality

The Extralink Vision Max projector offers exceptionally **clear and sharp images**, achieved by using precision optics and modern materials. Viewed scenes, even those full of action, are presented with unwavering sharpness on a large screen with a maximum diagonal of **300 inches**. The device also provides **faithful color reproduction and a high contrast ratio of 1000:1 and brightness of 800 ANSI**, which translates into a breathtaking visual experience. In addition, support for native **Full HD (1080p)** resolution and decoding of 4K video content ensures uncompromising clarity of the displayed image.

Performance and durability

High performance is ensured by modern components such as the **MSD6A358 processor** and also **3GB RAM**. The Extralink Vision Max projector lamp has been designed for long-term use of up to more than 30000 hours. All this is due to the careful selection of materials and a special cooling system that prevents components from overheating.

Wi-Fi 6 connectivity and useful connectors

The projector has built-in Wi-Fi 6, which guarantees smooth streaming media without buffering or stuttering. An **HDMI port and dual USB input** allow you to connect multiple devices simultaneously, opening up new possibilities for both work and entertainment.

Ease of use and customization

Although the Extralink Vision Max projector is equipped with a number of advanced options, its use is intuitive and requires no complicated procedures. With features such as keystone correction, zoom, screen aspect ratio adjustment and autofocus, you can easily adjust the image according to your preferences.

Design and aesthetics

The projector was designed with attention to detail to fit perfectly into any interior. The black and white color scheme fits harmoniously into both modern and classic space arrangements.
