Full product description

Wireless modem router ADSL2 + TD-W8960N

TP-LINK TD-W8960N is an extremely rugged 3-in-1 device that provides excellent network connections and high transmission speeds - a cost-effective solution for home and small businesses. **It guarantees stable network connection with speeds up to 300 Mbps.**

Comprehensive network solution

With the **TD-W8960N**, you can easily create a secure wireless network and share a high-speed Internet connection while accessing shared files, music, photos and printers from multiple computers. What's more, this versatile device allows for two different connection types: **ADSL or Ethernet WAN**, giving users flexibility

Easy access and high performance

TP-Link TD-W8960N can provide high performance access for individual users, SOHOs and small businesses. The router can be configured and managed via the Web-based management interface using the local Ethernet network or via remote management via the WAN interface.

Features of the device:

- ADSL 2/2+ modem (Annex A,I,J,L,M support), wireless access point (N standard) and 4 port router as one network device
- The use of N technology with transmission speeds of up to 300 Mbps is ideal for bandwidth-sensitive or interference-sensitive applications such as making phone calls over the network, playing online games, and even HD video transmissions.
- The Ethernet WAN port allows you to use the router for connections via VDSL, cable or fiber optic modem
- The Guest Network feature allows you to create an additional wireless network for guests
