Full product description

One device - great possibilities

TP-Link TD-W8970 is a stylishly designed device fulfilling functions of **NAT router, 4-port switch, ADSL2+ modem and wireless access point**. It allows to save a lot of space without the need of using several devices.

More power for you

With **300 Mbps 802.11n wireless connectivity** and **4 Gigabit LAN ports**, the TD-W8970 is a great solution for those looking for fast, reliable connections for work and entertainment such as conference calls, HD video streaming or online games. The **multi-functional USB port** allows you to share your printers locally and share files and media on your local network or the Internet.

IPQos functions and compatibility with IPv6

This device allows network administrators to allocate a certain amount of available bandwidth to each device connected to the network, simply identifying it by IP - **IP QoS**. This feature ensures that devices with critical tasks always have sufficient bandwidth and prevents another user device from accumulating bandwidth on the network.

The TD-W8970 V.3 supports IPv6, which is the cornerstone of the next generation of the Internet and provides a range of new services and a better user experience.

Features of the device:

ADSL 2+ modem, NAT router, 4 port Gigabit switch and wireless access point (N standard) as one network device

Wireless 300 Mbps and Gigabit Ethernet ports, ideal for multiple HD video streams

Versatile support for up to 10 IPsec VPN tunnels simultaneously

Multifunctional USB 2.0 port for sharing memory, printers, FTP server, media server and 3G/4G modem.
