Price: **186.09 zł** gross / 151.29 zł net

Manufacturer: TP-LINK

Referention number: DNXGFQKMMRMPL

Full product description

Dual-band 2.4GHz and 5GHz AC1350 network with infinite capabilities

TP-LINK EC230-G1 router (Archer C6 on steroids) broadcasts two separate wireless networks in **2.4GHz** and **5GHz** bands, ensuring highest quality wireless connections. Thanks to that, we have the option to use two dedicated wireless networks simultaneously, with speeds satisfying for even the most demanding users. Enjoy less demanding activities in the 2.4GHz band, such as email and web browsing, while using the 5GHz band for demanding, delay-sensitive uses such as online gaming or high-quality video streaming.

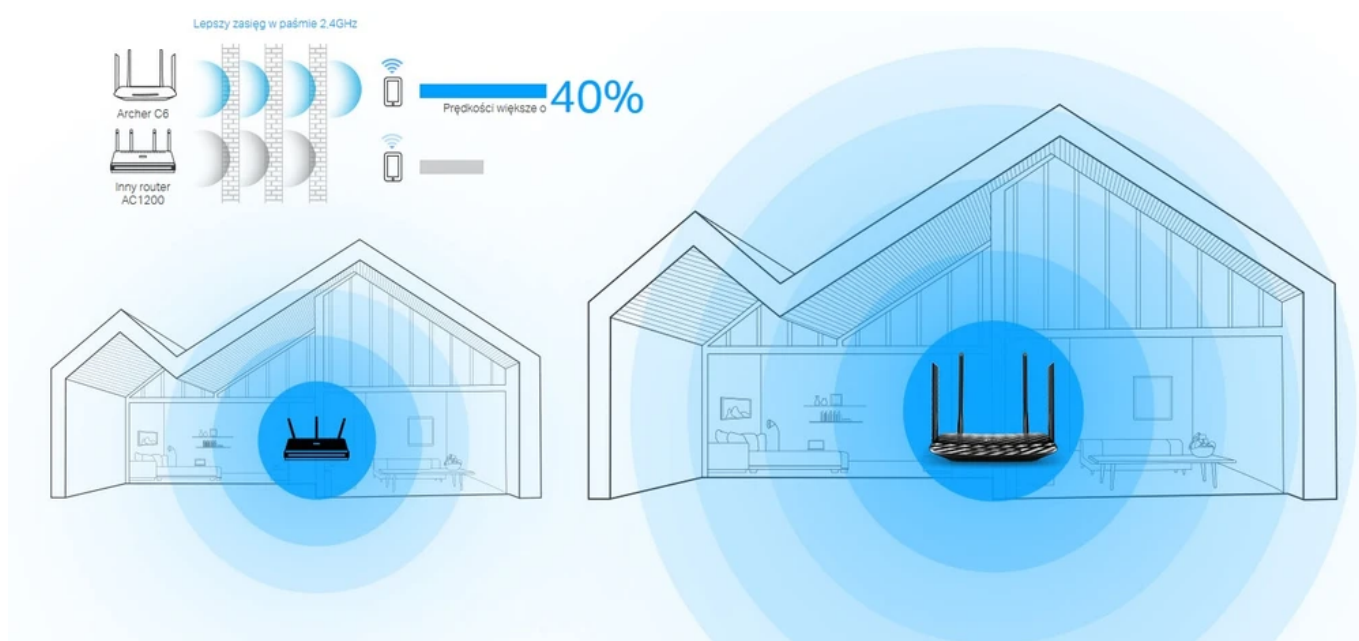

Endless entertainment thanks to 2.4GHz and 5GHz dual-band AC1200

The EC230-G1 broadcasts 2 separate wireless networks in the 2.4GHz and 5GHz bands, providing very high wireless performance. This gives you the ability to use two dedicated wireless networks simultaneously - with speeds suitable for even the most demanding applications. With this solution, you can enjoy everyday, less demanding activities, such as email and web browsing, by connecting in the 2.4GHz band while using the 5GHz band for demanding, delay-sensitive applications such as high-quality video streaming or online gaming.

High-quality antennas that provide coverage throughout the home

Four external antennas and one internal antenna will deliver Wi-Fi to every corner of your home. You can stop worrying about network availability and enjoy a fast connection whether lying on the couch or relaxing on the balcony. Equipped with a powerful chipset, the EC230-G1 always provides excellent Wi-Fi coverage. The 2.4GHz band is unrivalled, eliminates Wi-Fi "**dead zones**" and far exceeds the capabilities of other AC1350 routers.

MU-MIMO - higher speed, throughput and efficiency

The EC230-G1 gives you much more than just faster Wi-Fi. By increasing the efficiency of communication between devices, you can be sure of optimal network operation. **MU-MIMO 2x2** technology allows you to communicate with two devices **simultaneously**.

Even faster gigabit connections

With one **Gigabit WAN port** and four **Gigabit LAN ports**, the connection can be ten times faster than standard Ethernet connections. You will be impressed by the capabilities of the EC230-G1.

Easy and quick configuration with the Tether application

Free **Tether application** available for everyone! Download it today to your [Android](#) or [iOS](#) device. This app makes it easy to set up your router and adjust your network settings.
