Price: **109.00 zł** gross / 88.62 zł net

Manufacturer: EXTRALINK

Referention number: DNXGGKOLKRRMMM

Full product description

Smart water sensor with ZigBee support

The Extralink Water Sensor is a **smart water sensor** that detects flooding or water leakage based on the conductive state between metal probes. The sensor connects to a multifunction gateway [Extralink Smart Gateway](#) via the ZigBee protocol and allows you to create smart home scenes. The sensor can be easily paired with the Extralink gateway from the **Tuya app**. The sensor has low power consumption and long battery life.

FLOOD DETECTOR

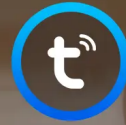

Flooding or
water leakage
detection

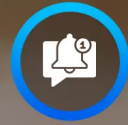

Connection to
Extralink
multifunction
gateway via ZigBee
protocol

Low power
consumption
and long
battery life

Pairing and
configuration
from the Tuya
app

Smartphone
push
notifications

Key features of the Extralink flooding sensor

Detection of flooding or water leakage Connectivity with Extralink multifunction gateway via ZigBee protocol Low power consumption and long battery life Pairing and configuration from the Tuya app Push notifications on your smartphone

Detection of flooding or water leakage

The Extralink flooding sensor uses the conductive state between metal probes to detect the presence of water on the surface where it is placed. When the sensor detects flooding or water leakage, it sends a signal to the Extralink multifunction gateway, which can trigger other smart devices.

DEGREE OF PROTECTION IP66

Fully sealed waterproof and dustproof IP66 design, works well in high humidity environments, no rusting, no short circuits, high sensitivity, no false alarms

Made of state-of-the-art nickel-plated carbon steel, the water level sensor warns and remains in place when the water level exceeds 0.5 mm

Connectivity with Extralink multifunction gateway via ZigBee

Extralink Smart Life Water Sensor connects to multi-function gateway [Extralink Smart Gateway](#) using the ZigBee protocol, which is safe, reliable and compatible with other smart devices. ZigBee is a low-power wireless communication protocol commonly used in the communication of smart home devices.

The Extralink Smart Life Water Sensor connects to the Extralink Smart Gateway via the ZigBee protocol, which is safe, reliable and compatible with other smart devices

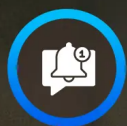

ZigBee is a low-power wireless communication protocol commonly used for communication between smart home devices

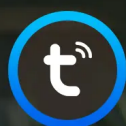

Notifications and alerts to your phone

The flood sensor allows you to **receive notifications and alerts to your phone** when it detects flooding or water leakage. To use this feature, connect the sensor to a multifunction gateway [Extralink Smart Gateway](#) using the Tuya app and allow it to receive push notifications. When the sensor sends a signal to the multifunction gateway, the Tuya app will send a notification to your phone.

Notifications and alerts to your phone

The flood sensor allows you to receive notifications and alerts to your phone when it detects flooding or a water leak

To use this feature, connect the detector to the **Extralink Smart Gateway** via the Tuya app and allow push notifications

Innovative double-sided design

The flooding sensor has an innovative two-sided design - the downward-facing probe can monitor flooding with water, the upward-facing probe can monitor rain and water leakage. The sensor can also be attached to the wall to detect water levels.

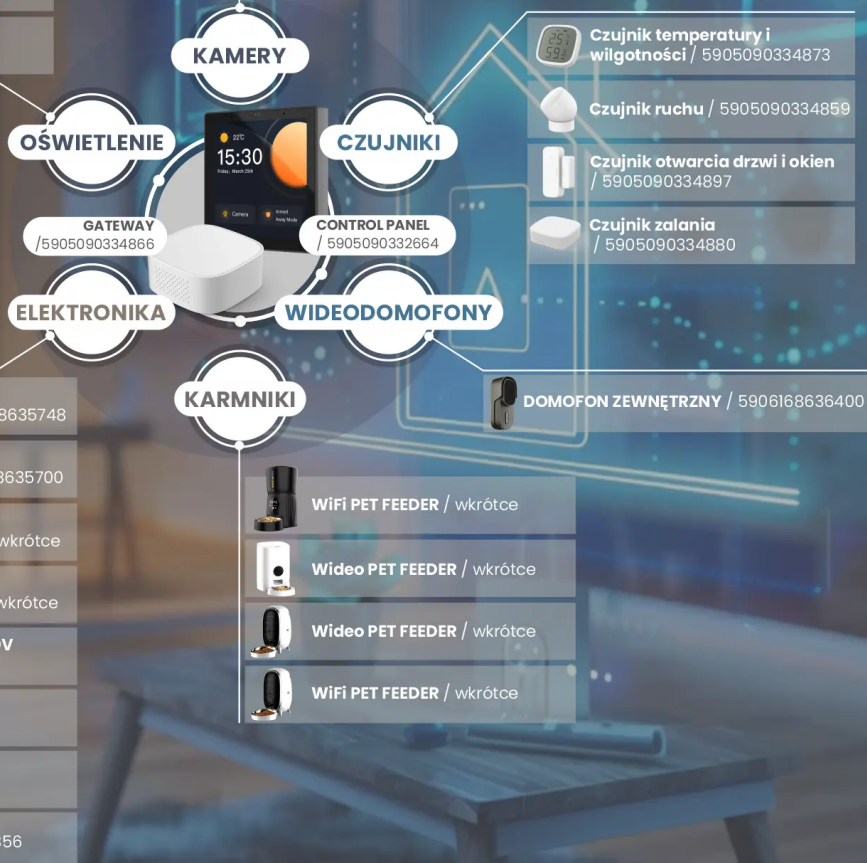

Degree of protection IP66

The IP66 degree of protection of the Extralink flooding sensor housing allows trouble-free operation in dusty and humid environments.
