Full product description

Gigabit WDM Media Converter

TL-FC311B-2 is a **SC Gigabit RJ45** fiber optic converter that converts electrical and optical signals. Long distance fiber optic transmission is ideal for commercial scenarios such as WI-FI or video surveillance.

How does the device work?

The TL-FC311B-2 supports WDM (Wavelength Division Multiplexing) technology, enabling it to send and receive data over distances of up to 2km over single-mode fiber cable, resulting in significant savings in network deployment. **The device sends signals at 1310 nm wavelength and receives at 1550 nm.**
