Full product description

TP-Link TL-MR3620 AC1350 - fast dual-band Wi-Fi

TL-MR3620 is a **double-band wireless** router that allows you to share a **3G/4G** connection in a wired or wireless network. It uses **MU-MIMO** technology, which allows the router to handle several devices simultaneously and transfer data 2x faster. The device also has beam shaping technology, which ensures high stability of connections. In addition, **three powerful antennas** provide coverage throughout the home.

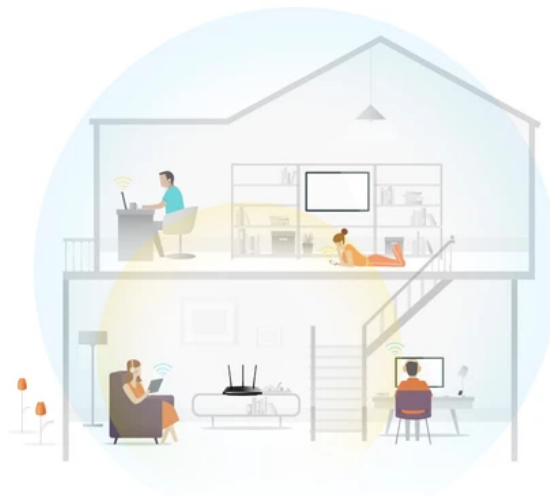

Provide a 3G/4G connection

Using the full capabilities of a TP-Link router, you will be able to enjoy download speeds up to **150 Mb/s**. Just connect **with a 3G/4G** modem to the router and you can enjoy Internet access on all devices.

The revolution in your home

The **TL-MR3620** wireless router broadcasts two separate **WiFi** networks, in the 5GHz band at speeds up to 867Mbps and in the 2.4GHz band at speeds up to 450Mbps. This allows us to use two dedicated wireless networks, with speeds even for more demanding applications. The device also allows for everyday, less demanding applications, such as web browsing or email, using the **2.4GHz** band while using the **5GHz** band for more advanced, demanding and delay-sensitive applications, such as streaming HD video or online games.

Efficient antennas

Powerful signal and long range - this was the motto of TP-Link designers creating wireless router TL-MR3620. The use of **three high-performance antennas** providing coverage throughout the house and using two bands of wireless network made them surely succeed, so you will never have to worry about losing the range while using your device again.

Parental control

With the TL-MR3620 Wireless Router, you can supervise and restrict network access for your children or employees as needed. Apply **Lock URL**, manage access to network resources with a black and white list.

Guest network

Create an additional wireless network that allows guests to use the Internet without accessing local network resources.

Simple configuration and management

It only takes a few minutes for **TL-MR3620 3G/4G** to be ready to work and fully configured. Just run the device management page and adjust the settings to your needs. Configuration can also be done on devices using [iOS](#) and [Android](#) - thanks to the intuitive **TP-Link Tether** application.
