Full product description

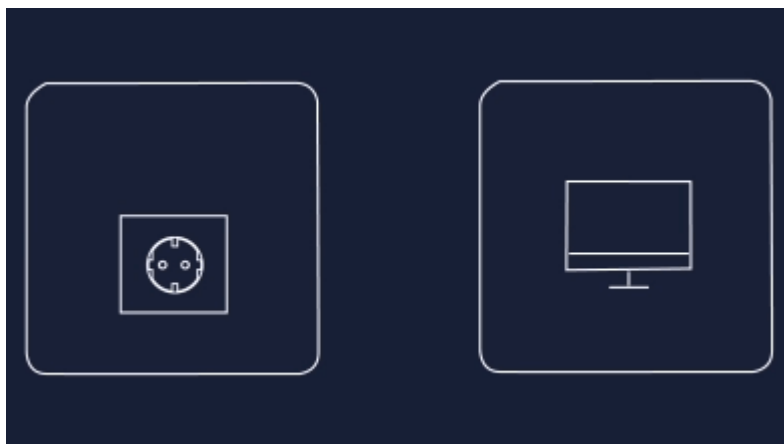

Give your network a new dimension!

The **TL-PA7010** transforms your existing electrical cables into a high-speed network at up to **1000 Mbps**. Simply plug the adapters into your power sockets to instantly create your network infrastructure, without wires or bits. Plug the first adapter into your router and plug the second adapter into the socket in the room where you need a network connection. The TL-PA7010P supports the new **Homeplug AV2** standard **with ultra-fast data transfer rates up to 1000 Mbps**, making it also ideal for streaming HD/3D/4K video.

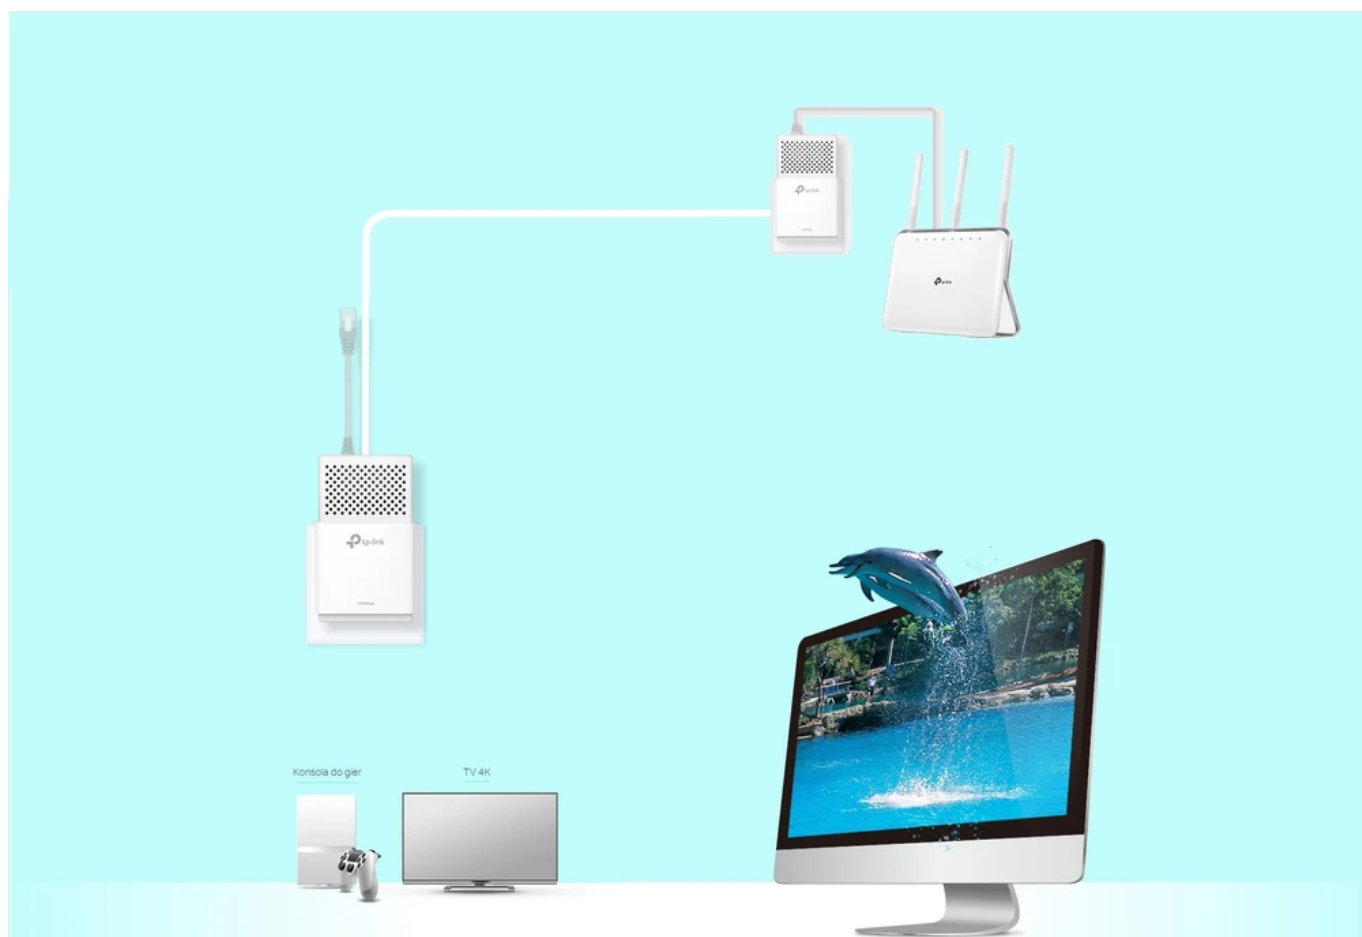

Plug and Play, no configuration required

The **TL-PA7010** is **very easy to use!** Just plug the adapters into an electrical outlet, then connect the devices to the adapters with an Ethernet cable and you're done!

Ideal for 4K films and online games

With **HomePlug AV2** technology, the TL-PA7010 can transfer data even faster, **up to 1000 Mbps**. Ideal for 4K movies and online games, no more network delays. The Gigabit Ethernet port allows users to connect bandwidth-hungry devices and provide multiple HD video streams.

High-speed Internet in every socket

No more problems with thick concrete walls or fireproof basements - **without drilling or laying new cables**.

Stable LAN connection in each room even on several floors.

Compatible with all common adapters and Powerline routers.

Easy to install with **Plug & Play**, no configuration required.

Up to **1 Gbps** according to the new standard **Homeplug AV2** via the existing electrical installation.
