Full product description

TP-Link PowerBank 10400 mAh

With a large battery capacity of **10400 mAh** power bank, the PB10400 is able to charge your phone up to 3 to 5 times, depending on its battery capacity. Built-in **LEDs** allow you to control the device's charge status at any time.

Simultaneous charging of two devices

Power bank TL-PB10400 is equipped with **two USB ports, 5 V/2 A and 5 V/1 A**, which will allow express charging of two devices at the same time, and often does it faster than the original charger. Thanks to TP-Link intelligent charging technology, the device will automatically adjust the power to the connected device.

Advanced security system

The energy bank from the **Ally series** has been equipped with **series of protections**, thanks to which your device is protected against short circuits, overvoltages, electrical overloads, excessive charging and discharging, as well as against overheating.

Energy efficiency at a high level

TL-PB10400 Power bank has an energy efficiency of **90%**, which allows you to fully charge your mobile phone up to **5 times**. The device is also able to charge up to **65% faster**, saving 40% of charging time. Using the PB10400's power bank, the battery in iPhone 6s Plus is fully charged **after just 150 minutes**, while the original power supply can take **even 250 min.**

Useful gadget, compatible with many devices

The power bank is compatible with most mobile devices charged with **5 V** via a **USB** port, such as tablets or smartphones. TP-Link had a great idea to put a **flashlight** in the power bank, which can be useful both at home and in the field.
