Full product description

TP-Link PB15600 Portable Power Station

The 15600 mAh energy bank from the **series Ally** is a high energy efficiency combined with a high work efficiency, which allows you to get even more energy to increase the number of charges. With a portable power station, you don't have to worry about the battery status of your devices during a long journey, family meeting, picnic or anywhere where there is no power source.

Top quality LG battery

Almost all batteries available on the market have a limited operating time, and their service life or performance gradually decreases, especially at low temperatures. Thanks to the use of strong LG accumulators in Ally power banks, battery exhaustion is much slower and operating time remains unchanged, even during the winter season.

Provides charging for two devices simultaneously

The high energy efficiency combined with the high power bank performance of the TL-PB15600 enables even faster charging. Thanks to **fast charging technology**, the device is able to handle two output ports at the same time, without energy drops. The power bank can handle both high-capacity devices, such as tablets, and those equipped with a smaller battery, such as smartphones.

Higher level of rapid loading

Power bank TL-PB15600 is able to charge up to **65%** faster, which slowly saves **40%** of charging time. For example, using the PB10400 power bank, the battery in iPhone 6s Plus is fully charged after just **150 minutes**, while the original power supply can take up to **250 minutes**. In addition, the power bank itself is able to fully recharge in **less than 6 hours**, while competitive power banks with a capacity of 15000 mAh will only replenish 50% of the power during this time and it will take **more than 12 hours** to recharge to 100%.

Compatible with many devices

The power bank is compatible with most mobile devices charged with **5V via USB**, such as tablets and smartphones. A great idea of TP-Link was to put a **flattery** in the power bank, which will be useful many times both at home and in the field.
