Price: **176.25 zł** gross / 143.29 zł net

Manufacturer: TP-LINK

Referention number: DNXEDKOSIRMMOH

### Product features

|                             |        |
|-----------------------------|--------|
| Height                      | 26 mm  |
| Width                       | 209 mm |
| Depth                       | 126 mm |
| Package weight              | 630 g  |
| Power consumption (typical) | 1.56 W |
| Flash memory                | 4 MB   |
| Package depth               | 254 mm |
| Package height              | 60 mm  |
| Package width               | 190 mm |
| Internal memory             | 64 MB  |
| AC input frequency          | 50 Hz  |
| AC input voltage            | 100 V  |

### Full product description

#### TP-Link broadband router - ideal choice for small businesses

The **TL-R470T** broadband router is equipped with 3 **LAN/WAN** ports, one **LAN** port and one **WAN** port. Thanks to this solution we have the possibility to use the services of several Internet providers simultaneously. The router also has a function of intelligent bandwidth load balancing depending on the current load of the links, which guarantees an efficient and continuous connection to the Internet. The device provides high return on investment with low overhead costs.

#### A well-protected network

To provide protection against unwanted attacks and threats from outside, such as **TCP/UDP/ICMP Flooding**, **Ping of Death**, the TL-R470T+

has an automatic **DoS (Denial of Service)** attack detection and blocking function. It also offers **IP/MAC/URL/WEB** filtering functions to prevent intruders from connecting to the network and visiting unwanted sites by network users. The device is equipped with algorithms that improve the operation of protocols, such as **FTP, H.323, SIP, IPsec** and **PPTP**, through the NAT of the router.

## Safety and comfort management

Thanks to welcome page authentication, we can be sure that only authorized guests are connected to our network, and thanks to bandwidth control, we have the possibility to limit bandwidth for specific IP addresses. The TP-Link R470T+ has been designed to protect our device in all conditions and therefore offers features such as surge protection and lightning protection up to **4 KV**.
