Full product description

TP-Link TL-SF1024M 24-Port desktop switch

The TP-LINK Desktop Switch **TL-SF1024M** is designed for use in small offices or at home. It is a state-of-the-art solution that supports **automatic recognition of the type of cable connected** and plug and play.

Fast data transfer with QoS service quality

The TP-LINK Desktop Switch TL-SF1024M operates in **full duplex** mode, enabling lightning-fast traffic exchange between clients and the network. The low-level **QoS service** helps prioritize valuable **VoIP or video** traffic, keeping relevant services running smoothly. The switch can be used to extend an existing stack.

Main features and functions

- 24 RJ45 10/100Mbps ports (automatic connection speed negotiation, automatic crossover Auto MDI / MDIX)
- Green Ethernet technology for reduced power consumption
- Reliable transmission is ensured by full duplex data flow control (IEEE 802.3x standard)
- Plastic desktop housing, also wall-mountable
- No configuration necessary thanks to plug and play functionality
