Full product description

Functions of TP-Link TL-SG2216

TP-LINK TL-SG2216 is a managed Gigabit switch with **16 Gigabit RJ45 10/100/1000 Mbps ports** and **2 SFP combo slots**. The device provides high performance, QoS, advanced security policies and numerous second layer management features. This TL-SG2216 Gigabit Switch is a cost-effective solution for small and medium businesses.

Key features

Gigabit Ethernet ports ensure data transfer at full speed

Optimise voice and video transmission with **QoS (L2/L3/L4)** and **IGMP snooping**

Command line and web browser management, **SNMP** and **RMON** support for convenient device management

VLAN 802.1Q, **Port Security** and **Storm control** offer efficient functions for local network security

Administrative functions dedicated to companies

TL-SG2216 is simple to use and manage. It supports various standard management functions such as the **intuitive graphical user interface (GUI)** or the **classic command line (CLI)**. With **SNMP** (v1/2/3) and **RMON** functions, the switch can also provide valuable information about its status and send alarming notifications when unusual events occur.
