Full product description

TP-Link TL-SG2424 functions

TP-LINK TL-SG2424 is a managed Gigabit switch with **24 Gigabit RJ45 10/100/1000 Mbps ports** and **4 SFP combo ports**. The device provides high performance, QoS function, advanced security rules and numerous management functions in the second layer. This Gigabit switch TL-SG2424 is a cost-effective solution for medium and small businesses.

Key features

Gigabit Ethernet ports for full speed data transfer

Optimise voice and video transmission with **QoS (L2/L3/L4)** and **IGMP snooping**

Command line and web browser management, **SNMP** and **RMON** support for convenient device management

VLAN 802.1Q, **Port Security** and **broadcast storm control** offer efficient functions for local network security

Device management functions dedicated to companies

TL-SG2424 is easy to configure and manage. It supports a number of standard management functions, i.e. the **intuitive management interface (GUI)** or the **classic command line (CLI)**. With **SNMP** (v1/2/3) and **RMON** functions, the switch can also report its status and send alerts during unusual events.
