Full product description

48-port Gigabit smart switch with four SFP ports

TP-LINK TL-SG2452 smart Gigabit switch is a cost-effective solution for small and medium businesses. TL-SG2452 has many security features: Storm control protects against broadcast storms, "Quality of Service" (QoS, L2 to L4) offers optimized traffic management and faster and smoother data transfer. Thanks to the user-friendly network interface with SNMP and RMON, TL-SG2454 can be quickly configured and configured to be secure. TP-LINK's Gigabit Smart Switch TL-SG2452 is the ideal solution for workgroups and departments that require an economical Layer 2 switch and Gigabit performance.

Extended QoS functions

The Gigabit switch is equipped with comprehensive QoS features to integrate voice, data and video services. To ensure that voice and video transmissions work properly and smoothly, the administrator can set traffic priority based on several variables, including port, 802.1P priority and DSCP.

Extensive management functions

TL-SG2452 is easy to use and manage. **It supports many standard management functions, such as an intuitive web-based GUI or SNMP (v1 / 2/3).** RMON support allows you to call up valuable status information via the switch and send alerts in case of unusual events.
