Price: **528.75 zł** gross / 429.88 zł net

Manufacturer: TP-LINK

Referention number: DNXGGIMJGRMLOO

Product features

Storage relative humidity (H-H)	5 – 90%
Height	26 mm
Width	209 mm
Depth	126 mm
Auto-negotiation	Yes
Input current	2.43 A
Storage temperature (T-T)	-40 to 70 °C
Rack mounting	No
Humidity measurement range	10 – 90%
Harmonized System (HS) code	85176990
Switching capacity	7.6 Gb/s
Networking standards	IEEE 802.3af
Switch type	Unmanaged
10G support	No
IFU / User manual	Yes
Auto MDI/MDI-X	Yes
Operating temperature (T-T)	0 – 40 °C
Package type	Box
Total Power over Ethernet (PoE) budget	124 W
Jumbo frames	16000
Jumbo frames support	Yes
MAC address table	2000 entries

Power supply included	Yes
Power over Ethernet (PoE)	Yes
SFP module slots quantity	1
Power over Ethernet plus (PoE+) ports quantity	8
Cable types supported	Cat3
Store-and-forward	Yes
Copper ethernet cabling technology	100BASE-TX
Product colour	Black
Power connector	DC-in jack
Number of power supply units	1
Basic switching RJ-45 Ethernet ports type	Fast Ethernet (10/100)
Basic switching RJ-45 Ethernet ports quantity	10

Full product description

TP-Link TL-SL1311MP Desktop Switch

The **TP-Link TL-SL1311MP desktop** switch is an **8-port 10/100Mbps and 3 Gigabit ports** switch that requires no configuration. With 8 PoE (Power over Ethernet) ports, it can **automatically detect and power all** IEEE 802.3af/at compliant powered **devices** (PDs). In this situation, electricity is transmitted along with data over a single cable, allowing you to extend your network in places where there are no power lines or outlets, or where you want to mount devices such as access points, cameras, phones, etc.

- 8 RJ45 10/100 Mbps ports, 2 Gigabit RJ45 ports, 1 Gigabit SFP port.
- 8 PoE ports - transfer data and power devices using the same cables.
- Compatible with IEEE 802.3af/at devices
- Up to 30 W of power for each PoE port
- Up to 124 W total PoE power for use on 8 PoE ports*.
- Up to 250 m data and power transmission range in Extend mode**.
- Isolation mode allows one-click separation of client-generated traffic for enhanced protection and performance.
- The switch automatically detects and restarts PoE-capable devices when they stop working or responding to requests.
- Fanless design reduces power consumption and ensures quiet operation.
- Plug and play connectivity, no configuration or complex installation required.

Range and convenience

Ideal for IP surveillance - PoE transmission over **long distances** and **one-click traffic separation**. With the Extend Mode, PoE **transmission distance** reaches **up to 250m**** - ideal for installing cameras over large areas. **Isolation Mode** allows one-click traffic separation on ports 1-8 to prevent snooping and tampering. This allows the switch to isolate the broadcast storm for greater security and performance.

Durable metal housing

The internal components of the **TL-SL1311MP** are protected by a high-quality metal housing, ensuring a **long product life**. The fanless design ensures **no additional noise** at the installation site. The TL-SL1311MP switch has undergone a series of rigorous reliability tests, ensuring **switching performance** you can rely on.
