Full product description

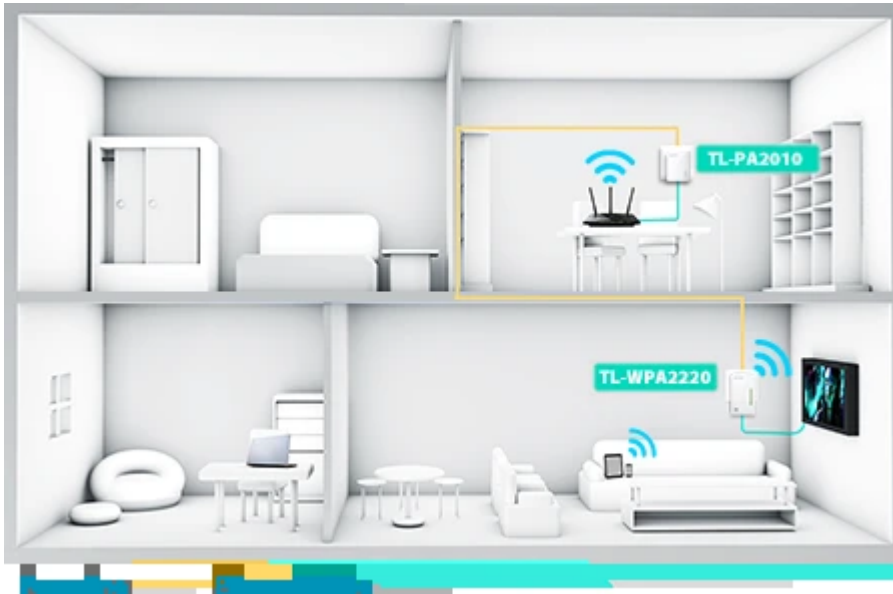

Network Transmitter Set TL-WPA2220KIT AV200 300Mbps

TP-Link TL-WPA2220KIT is **a set of network transmitters** allowing to extend home wired network to any room - using existing electrical network. It reaches speeds of up to **300 Mbps**, enabling seamless streaming of HD video or smooth online gaming. The device is easy to set up, just press the Wi-Fi Clone button - and you're done.

Expanding the wireless network coverage

Using the **Wi-Fi Clone** button, you can automatically copy the name and password of the **wireless network** from your home router. Then just place the device at its destination - and you can use the **wireless or wireless** connection anywhere in the house.

WiFi access on all connections

The device allows you to establish a connection with the network through the electrical network existing in your home, and then the connection is made available by wireless means - in any corner of the house.

Easy Plug and Play configuration

You can easily establish a connection through the electrical network - just plug the transmitters into the sockets. In addition, with the Pair button you can easily secure your transmission and add more transmitters to the mains. Plug the transmitter into a power outlet near a device that connects to the Internet (modem or router), connect the device to the transmitter using an Ethernet cable. Connect additional transmitters to the electrical network - you will connect other network devices - computers, laptops, TVs - both via Ethernet cables and wirelessly.
