Full product description

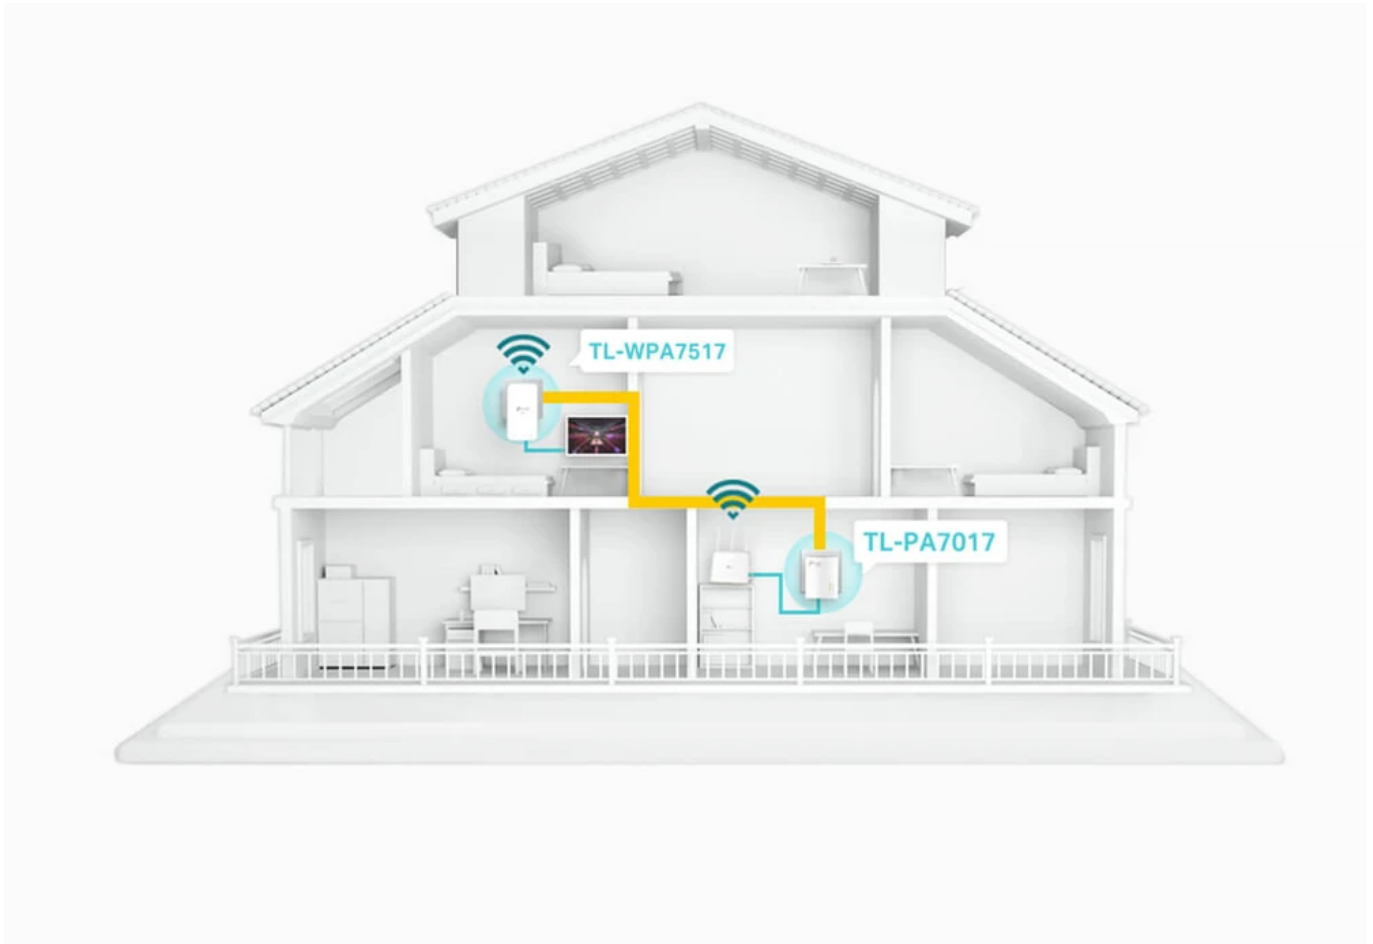

Set of Gigabit AV1000 Network Transmitters

The TL-WPA7517 KIT transforms the existing electrical circuit in your home into a Gigabit network and brings the Internet to all the places where there is an outlet. With the advanced **HomePlug AV2** technology, TL-WPA7517 KIT provides a stable and fast WLAN connection and transmits up to 1000 MB/sec over the powerline up to **300 meters**. With **TL-WPA7517KIT**, streaming HD video, playing online and downloading large files without interruption is a breeze.

Range up to 300 metres

With the advanced HomePlug AV2 technology, TL-WPA7517 provides a stable and fast WI-FI connection. Delivering data transfer rates of up to **1000MB/s** over the powerline cabling within a range of up to 300 meters. Stream in HD quality, play online games and download large files without interruption.

Wi-Fi for advanced online experiences

Featuring 802.11ac Wi-Fi technology, the TL-WPA7517 supports dual-band Wi-Fi(**simultaneous 300MB/s in the 2.4GHz band and 433Mbps in the 5GHz band**) with more bandwidth and less interference, maximizing your powerline network performance.

One-touch Wi-Fi setup

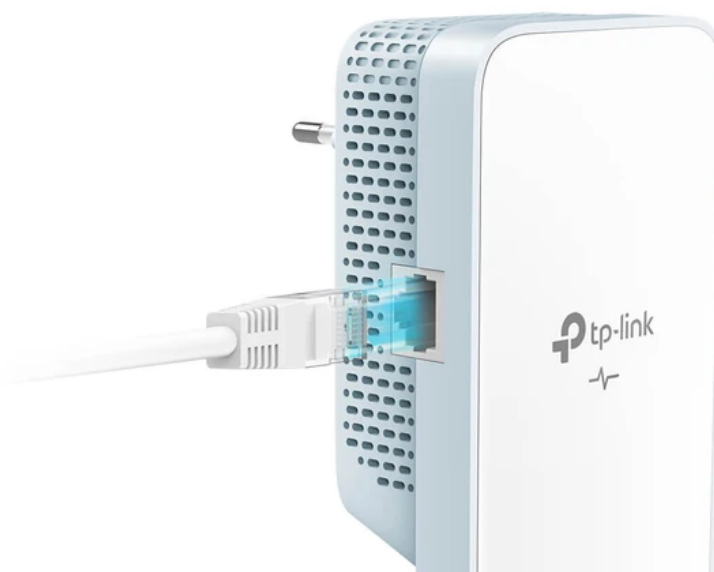

With a single click, the device instantly copies the network name and password from your router for easy setup. **Plug and Play**, no configuration required:

- Connect TL-PA7017 to your router.
- Plug the TL-WPA7517 into an outlet in the room where you need the network.
- Enjoy your wired or wireless Internet service.

Gigabit Ethernet for high-speed wired connections

One **Gigabit Ethernet** port provides a reliable, high-speed wired connection for bandwidth-hungry devices such as gaming consoles, Smart TVs, set-top boxes and more.

Powerline management on your smartphone

Manage your powerline WI-FI with the **tpPLC** app on your smartphone (Android, iOS), or download the new tpPLC Utility for PCs to manage your powerline network.
