Full product description

Compact Nano WiFi router TP-Link WR702N

TP-Link TL-WR702N is the smallest wireless router with very simple operation. It is designed for use with tablets, smartphones, portable game consoles and other portable wireless devices. The device allows a convenient connection to the Internet with a connection speed up to **150 Mbps**. Thanks to its small size, it is ideal for use on the road and is powerful enough to support almost all basic wireless applications.

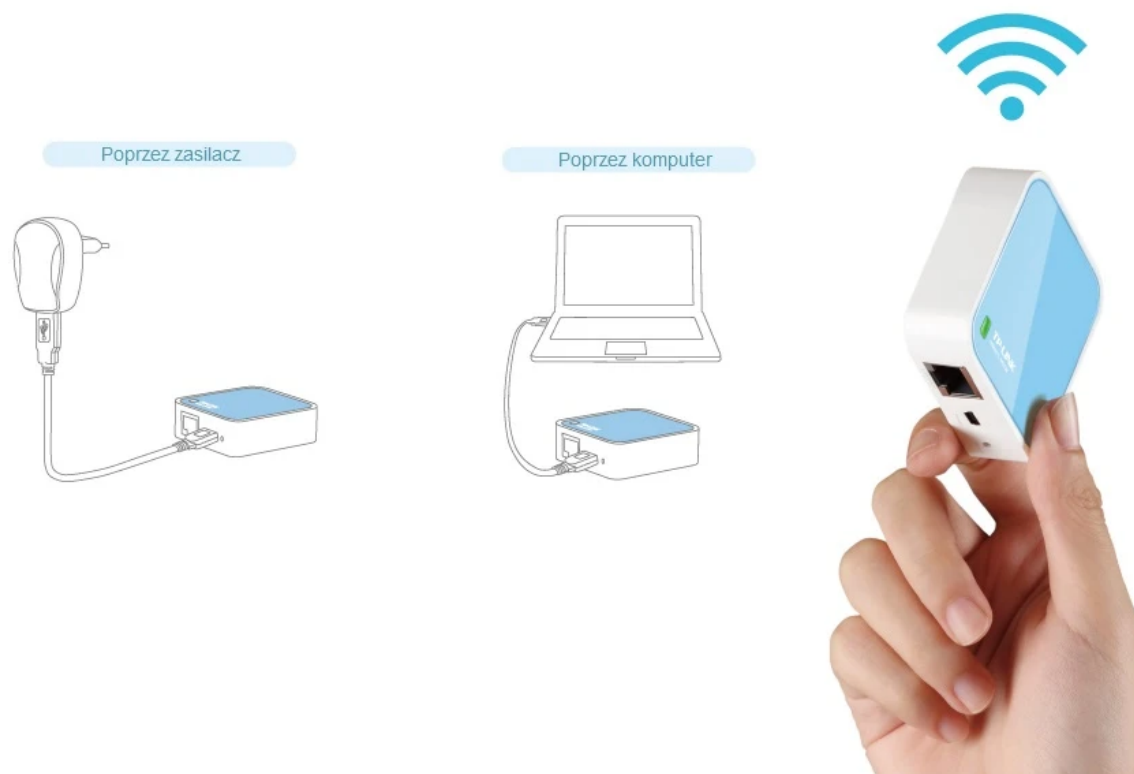

NANO - ideal for home or travel!

TL-WR702N is the smallest wireless router with very simple operation. Simply plug it into an outlet in your hotel room and enter a password to create a wireless hotspot in no time at all.

Flexible power supply with USB-B port

The TL-WR702N has a USB-B port and can be powered by an external power supply unit or a USB cable connection to a computer. All you need to do on the go is connect the TL-WR702N to your computer's USB port or car charger to share the wireless connection with family and friends.

Multi-tasking and secure WiFi router

The TL-WR702N supports **AP, Router, Bridge, Client and Repeater** operating modes, allowing different wireless applications to provide users with more dynamic and complex wireless operations. In addition, for the highest level of user security, **the router supports WEP, WPA/WPA2 and WPA-PSK/WPA2-PSK encryption.**
