Full product description

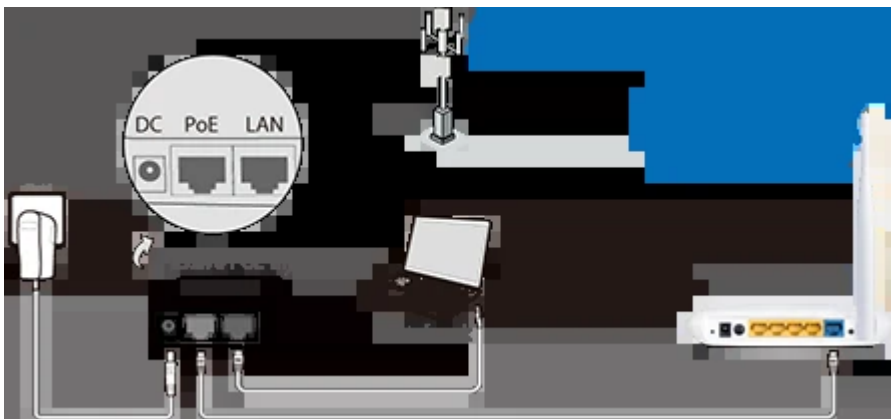

Wireless router TL-WR741N

TP-LINK Wireless Router **TL-WR741N** provides wireless connectivity up to 150 MB/s. The device has been equipped with one WAN port 10/100 MB/s and four LAN ports supporting **IEEE 802.11b**, **IEEE 802.11g**, and **IEEE 802.11n** standards. The output power of external antennas is 3 dBi.

WISP support

With a maximum data transfer rate of up to **150MB/s**, the device easily handles even the most demanding applications. Including VoIP telephony, HD video streaming and online gaming. Thanks to N technology support the router transmits data over long distances despite obstructions in the form of walls.

Power over Ethernet

Thanks to **PoE** technology the router can be placed in a place without a power outlet, the device is powered through the RJ-45 port. Users requiring better WISP signal will appreciate the possibility of connecting the router in garage or attic.

High standard of security

Secure your network the easy way. **WPS (Wi-Fi Protected Setup)** support allows you to set up your security network almost instantly with a single press of the WPS button, which is secured with WPA2 encryption. This provides a higher level of security than standard WEP encryption.

Wireless N speed and range

Supporting the **IEEE 802.11n** standard, TL-WR743ND creates a wireless network that reaches up to 9 times the speed and 4 times the range of traditional IEEE 802.11g devices. With transfer rates of up to 150 MB/s, you can enjoy even faster Internet browsing and file sharing, media streaming and Internet telephony.
