Full product description

Wireless router with high speed Wi-Fi

The TL-WR940N is a **wireless** router that works according to the **N** standard at speeds up to **450 Mb/s**, allowing you to create wired and wireless network connections. The device is designed for small businesses and home use. The device uses **3T3R MIMO™** technology providing unprecedented transmission performance that enables smooth HD video transmission, VoIP communication and smooth operation of online games. On the stylish device casing there is a **Wi-Fi Protected Setup (WPS)** function button, which allows you to activate a connection using WPA2 encryption mechanism to protect your network against external threats.

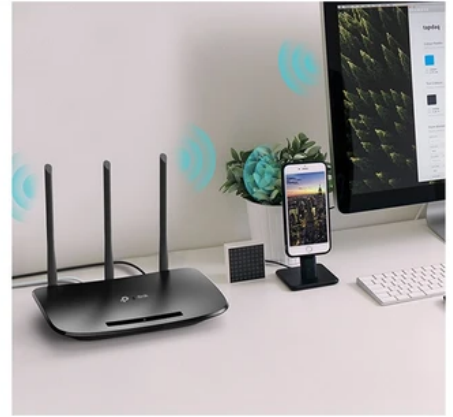

Standard N - fast download and smooth transmission

TL-WR940N is a high speed router operating in accordance with **IEEE 802.11b/g/n** standards. It works based on **802.11n** technology, providing wireless connections with speeds up to **450 Mb/s**. This allows it to easily meet the highest requirements of home users, providing smooth HD video transmission, constant access to online games and fast download of large files.

Multi-tasking router

TL-WR940N from **TP-Link** can be used in router, access point or signal amplifier mode. You can easily create a private wireless network, turn a wired network into a wireless one or extend your Wi-Fi range.

Simple configuration

Use the intuitive **Tether** application, to manage and configure your device in minutes. Thanks to the application you can do it via your smartphone or tablet with [Android](#) or [iOS](#).
