Full product description

TVIP S-Box v.710

The wide range of TVIP S-Box models allows you to choose a media center that better meets your requirements. TVIP Mediacenters are versatile and we can provide exactly what you need. **IPTV decoder**, running on a powerful quad-core **Amlogic S905W2 1.2 GHz** processor. It has a quad-core Mali-450 graphics chip, **1 GB RAM and 8 GB Flash** memory. It supports 3840x2160 (HDR) resolution (1080p 60fps or 2160p 30fps) and codecs H.265 (10-bit), VP9, H.264, MPEG4 ASP, Xvid, MPEG2, MJPEG 2160p 30fps. **Android 11** operating system. the decoder is equipped with **HDMI , AV, Ethernet, microSD card port and USB** port.

Incredibly powerful processor

TVIPs always use a modern **SoC** with a powerful multi-core processor, which allows you to enjoy all the modern multimedia applications that have not only been developed today, but will be developed in the next few years. The **Amlogic S905W2** makes the STB much more powerful and enables **4K** video playback.

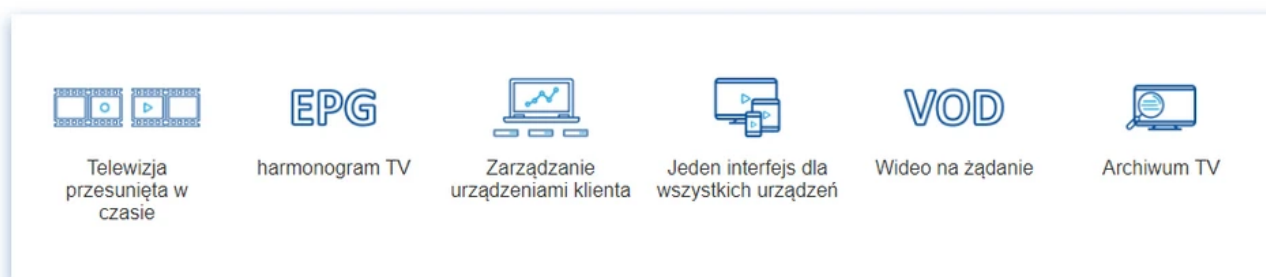

TVIP S-BOX with USB support for multiple devices

All **TVIP S-Boxes** support USB-host connection. You can connect flash drives, hard drive, keyboards and wireless remotes. Video or music directly from an external hard drive or flash card will be a great addition to your service.

Learning remote control

Setup is quick and easy. The remote control supports a learning function to control the TV. The learning configuration does not reset after battery replacement.

Multiple screens

Create channel packages for different devices: tablets, TVs and phones.
