Price: **62.67 zł** gross / 50.95 zł net

Manufacturer: EXTRALINK

Referention number: DNXGGLQPLRMNIN

Product features

Height	60 mm
LED indicators	Power
Width	170 mm
Depth	200 mm
Maximum extruder tip temperature	235 °C
Power supply type	USB
USB charger included	Yes
Nozzle width	1.75 mm
Display type	LCD
Product colour	Black
Print technology	Fused Filament Fabrication (FFF)
Built-in display	Yes
Printing material	ABS
Watch case material	Acrylonitrile butadiene styrene (ABS)
Product weight	100 g

Full product description

A gift for the whole family

Develop the creativity of your whole family with a 3D pen. It's a quality tool available at an affordable price that not only keeps you entertained, but also opens the door to improving spatial thinking, increasing creativity and honing your artistic skills. Whether you're spending time

together, creating unique handmade gifts, decorating your home or doing everyday repairs, the 3D pen is the perfect tool. Its filament dispensing feature allows for optimal control over any project, from intricate designs to quick fills, making it ideal for all ages and skill levels.

Ready-to-use kit

The 3D pen is extremely easy to use - just plug it in, heat it up, load the filament and you can start creating 3D masterpieces! It uses versatile and easy-to-use PLA plastic, which will work well for beginners and advanced users alike. Get ready to easily turn your creative visions into reality!

Beginner-friendly

Starting to use the 3D pen is a piece of cake. All you have to do is plug it in, select your filament and wait for the pen to heat up (which usually takes about 2-3 minutes). Inserting the filament is easy, and intuitive controls make it easy to control its flow. Once you're done, withdrawing the filament is just as easy. The pen is designed to be accessible to everyone, making it a great choice for beginning artists and hobbyists.

Multifunctionality

The flexibility of the 3D pen is important. It can work with different types of filaments, including PLA and ABS, and has adjustable temperature settings. The unique liquid filament dispensing system guarantees full control over the drawing speed, making it a suitable tool for a variety of projects - from intricate details to faster fills.

Safe and risk-free purchase

Safety and efficiency are top priorities when it comes to the 3D pen. Its ceramic nozzle and high-quality motor are carefully designed to avoid clogging and ensure smooth operation. Features such as automatic pen sleep, anti-clogging mechanisms and intuitive controls contribute to smooth and easy use.
