Price: **770.53 zł** gross / 626.45 zł net

Manufacturer: UBIQUITI

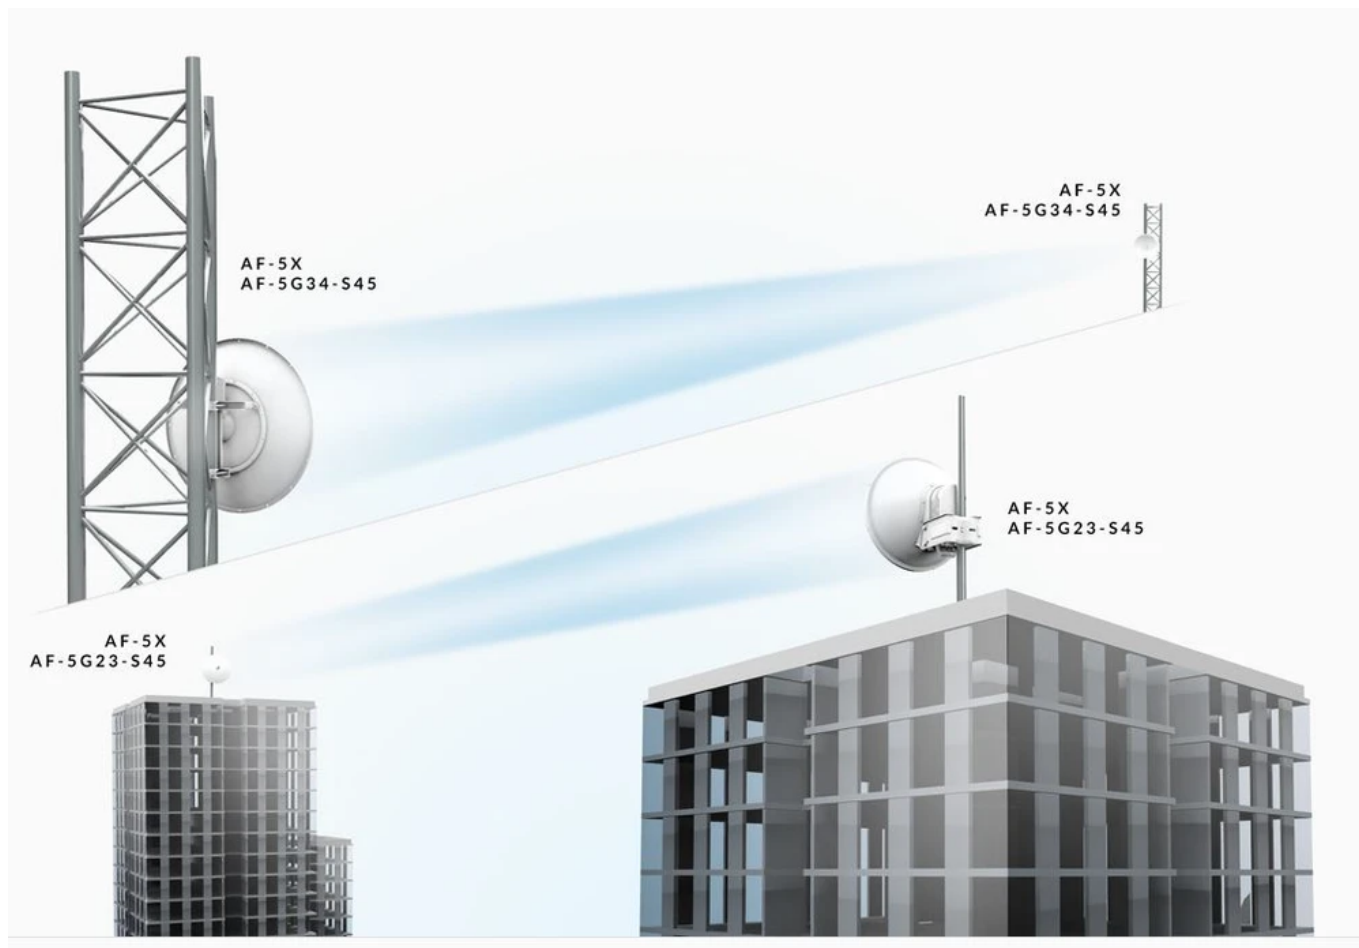

Referention number: DNXEGLIMHRMMGJ

Full product description

A small footprint for flexible deployment.

The **airFiber X** device together with the airFiber X antenna can be used as a high quality end point, point-to-point bridge or network backhaul. AirFiber X supports slant polarization $\pm 45^\circ$ to increase noise immunity and use **SNR**. The compact design allows airFiber X to be mounted on Ubiquiti antenna without the need for special tools. Compact design allows airFiber X antennas to be used in various applications, from connections between towers to **PtP** bridges between buildings.

Plug and Play integration

Thanks to the use of simple but effective and reliable solutions, installation of the Ubiquiti AIRFIBER antenna is very easy. The product can be integrated with dedicated AirFiber X devices.

Advanced radio isolation design

Ubiquiti AIRFIBER SLANT 45 AF-2G24-S45 is a special directional antenna in the form of a dish, operating in the **2GHz** frequency band and with **24dBi** gain. The radiation characteristics guarantee the highest possible signal-to-noise ratio (SNR) and high resistance to interference from other devices. The ubiquiti antenna is designed to provide users with **reliable connections** and **high performance**.
