Price: **1,990.96 zł** gross / 1,618.67 zł net

Manufacturer: UBIQUITI

Referention number: DNXEGMPJJRMMLI

Full product description

airFiber - fast signal transmission and high performance

AirFiber® X features industry-leading spectral performance up to **17.1 Mbps/MHz**. It uses patented Hybrid Division Duplexing technology to achieve the highest TDD throughput - available for long-range **PtP** links.

Designed for high performance

Ubiquiti **INVICTUS™** is a chip and a patented radio architecture specially designed for long distance wireless applications.

 500+ MBPS THROUGHPUT	 200+ KM RANGE	 GPS SYNCHRONIZATION
 PLUG-AND-PLAY ANTENNA INTEGRATION	 ULTRA-LOW LATENCY	STARTING AT \$399 MSRP

Flexibility of the device

The small size allows to use airFiber X with airFiber Slant 45 antennas or its instant upgrade to **Rocket™ 5 GHz**, which uses RocketDish™ RD-5G30/RD-5G34 antenna.

Wireless connections

It enables the implementation of 2.4, 3, 4, 5 or 11 GHz - a model that meets specific frequency requirements anywhere in the world. AirFiber X offers a variety of channel width options that can be customized to meet your needs. It has up to **11** different channel sizes.

Optimal operation and configuration of channels

Channel width flexibility allows for independent configuration of channel frequencies **TX** and **RX** and place them anywhere in the radio band - to avoid local interference. It is also possible to program different operating cycles - to meet asymmetric network traffic requirements.
