Full product description

Advanced radio signal isolation design

Directional antenna UI Airfiber Dish 5 GHZ 30Dbi Slant 45-5G30-S45 from Ubiquiti is perfect for creating **high quality radio connections** with long range. Ubiquiti made sure that the Ubnt airFiber model is very functional has **exceptional efficiency**. Combine airFiber X antenna with an airFiber X radio allows to create a high performance endpoint, point-to-point bridge and networking solutions. AirFiber X radio for the airFiber Dish AF-5G30-S45 antenna is sold separately.

Rugged construction

The UI AF-5G30-S45 directional antenna is extremely robust. Robust housing and **high quality materials** make the antenna characterized by high resistance to hostile weather conditions (including wind up to 200 km/h). This antenna from Ubiquiti has a solid construction, which is both light and easy to install. The directional antenna airFiber AF-5G30-S45 uses the **5 GHz** band. Its design is based on modern **MIMO 2x2** technology.

Quick installation

Combining the airFiber X antenna with the airFiber X radio allows you to create a high performance endpoint, point-to-point bridge, or networked backhaul (airFiber X radio is sold separately). The airFiber X antenna uses the 5 GHz band.
