Price: **6,334.88 zł** gross / 5,150.31 zł net

Manufacturer: UBIQUITI

Referention number: DNXXGFPJLRMMKN

Product features

Input voltage	38 V
Antenna type	Directional antenna
Operating temperature (T-T)	-40 - 55 °C
Cabling technology	10/100/1000Base-T(X)
Frequency band	11 GHz
Mounting	Wall/Pole
Power source type	DC
Product colour	White
Gain	35 gain

Full product description

Ubiquiti airFiber 11

Ubiquiti airFiber 11 is the first modular airFiber antenna system built specifically for **11 GHz** licensed frequencies, freeing itself from the crowded 5 GHz band. **AirFiber 11**, housed in a compact, high-performance chassis, delivers amazing Gigabit+ wireless performance, low latency and long range, making it ideal for backhaul, construction or public safety applications.

Upgradeable to Full-Duplex 11GHz

For existing Ubiquiti® AF-5 and AF-5U installations, the AF-11G35 provides a quick and convenient way to upgrade to the licensed 11 GHz band. The device uses the same antenna mount as the airFiber AF-5 and AF-5U, so by simply replacing the AF-5 or AF-5U with the AF-11G35, we can quickly and easily upgrade the unlicensed 5GHz link in full duplex mode to the licensed 11GHz link.

Great design

The airFiber **AF-11G35** antenna, equipped with an antenna reflector, provides excellent beam directionality and is characterized by a robust mechanical construction through the use of durable materials for outdoor applications.

Plug and Play installation

The AF-11G35 antenna has a built-in mount for **AF-11FX**, so installation does not require any special tools. Simply snap the airFiber AF-11FX radio securely into place and mount the antenna.
