

Ubiquiti AM-5AC21-60 | Sector antenna | airMAX, 5GHz, 21dBi

link to the product:

<https://www.batna24.com/gb/p/wi-fi-lte-antennas/ubiquiti-am-5ac21-60-sector-antenna-airmax-5ghz-21dbi>

Price: **749.87 zł** gross / 609.65 zł net

Manufacturer: UBIQUITI

Referention number: DNXLKSOHTMH

Product features

Height	750 mm
Width	173 mm
Depth	78 mm
Harmonized System (HS) code	85177100
Antenna gain level (max)	21 gain
Mounting	Wall
Product colour	White
Voltage Standing Wave Ratio (VSWR)	1.5:1
Horizontal beam width	60 °
Vertical beam width	60 °
Polarization	Dual polarization
Product weight	4800 g

Full product description

Breakthrough transmission performance

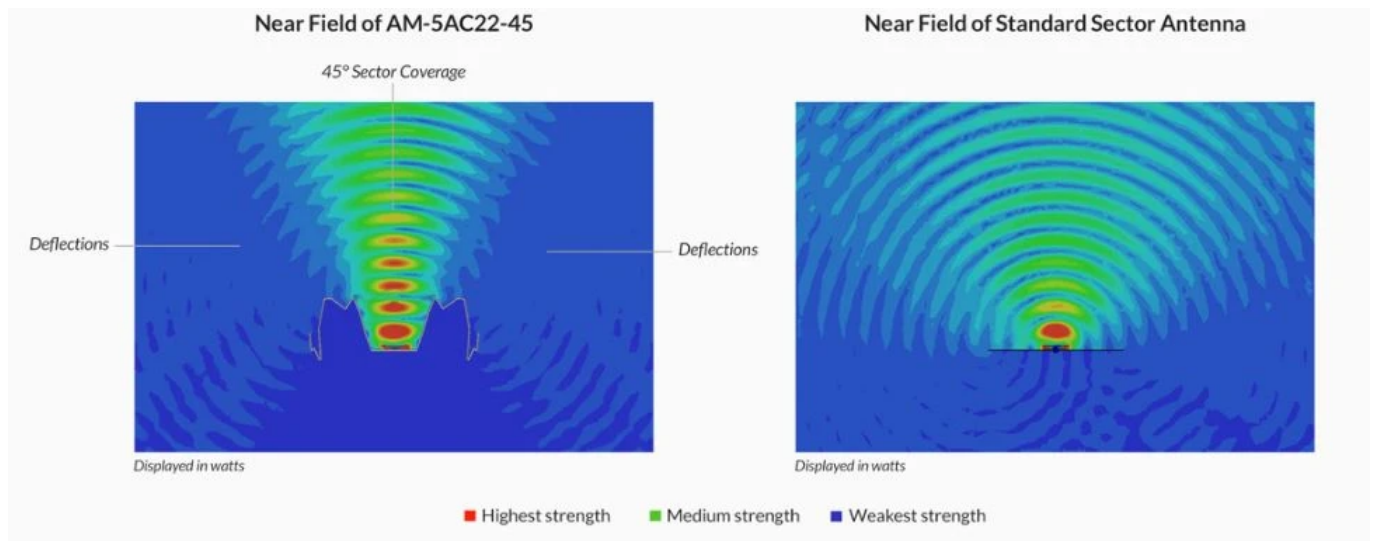

The next generation of **2x2 MIMO** sector antennas from Ubiquiti Inc., airMAX ac sector antennas have better scalability, **interference isolation** and beam performance. For best performance, connect the antenna with a Rocket radio. Antennas are also compatible with RocketM5 models. However, AC operation requires Rocket5ac. The Ubiquiti antenna operates at **5GHz** which allows for fast communication.

Immunity against interference

Sector antennas are very **resistant to interference**. The innovative deflector design with lowered side and back leaves reject interference from other transmitters in the vicinity potentially on the same tower.

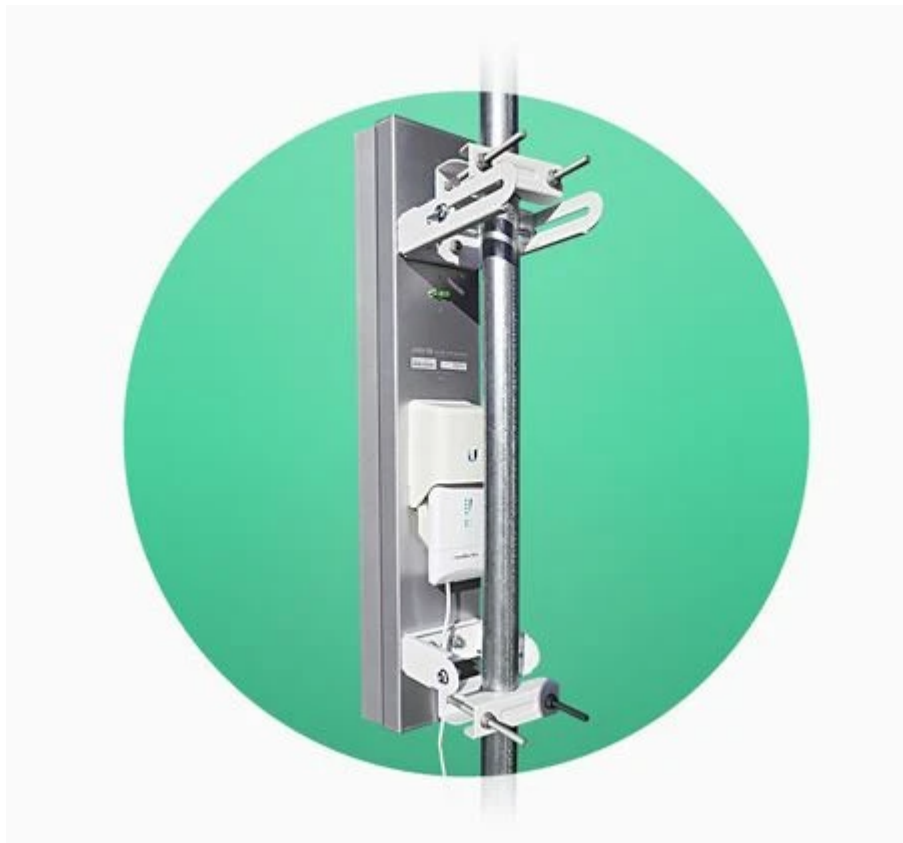

High performance wireless transmission

The signal-to-noise ratio (S/N or SNR) has been improved, it is possible to use higher order modulation, for example **256QAM** instead of 16QAM. This increases the number of bits per second for a band with constant data rate.

Rugged construction

Due to its innovative design, AirMax Sector ac provides higher profit and high performance. The **airMAX ac** antennas are designed for outdoor applications. Antennas are designed to reject interference and provide increased scalability, higher gain and high beam performance in **PTMP** networks. They use **AirMax** technology to provide high performance and power.

Easy Plug and Play installation

Every **Ubiquiti airMAX ac** sector antenna has a built-in **Rocket** handle, so no tools are needed to install the Rocket BaseStation.
