Full product description

Breakthrough design and performance

The **airMAX ac** sector antenna features an innovative deflector design and **2x2** bipolar performance for the airMAX network. The ubiquiti antenna works on 5GHz frequency which allows for fast communication.

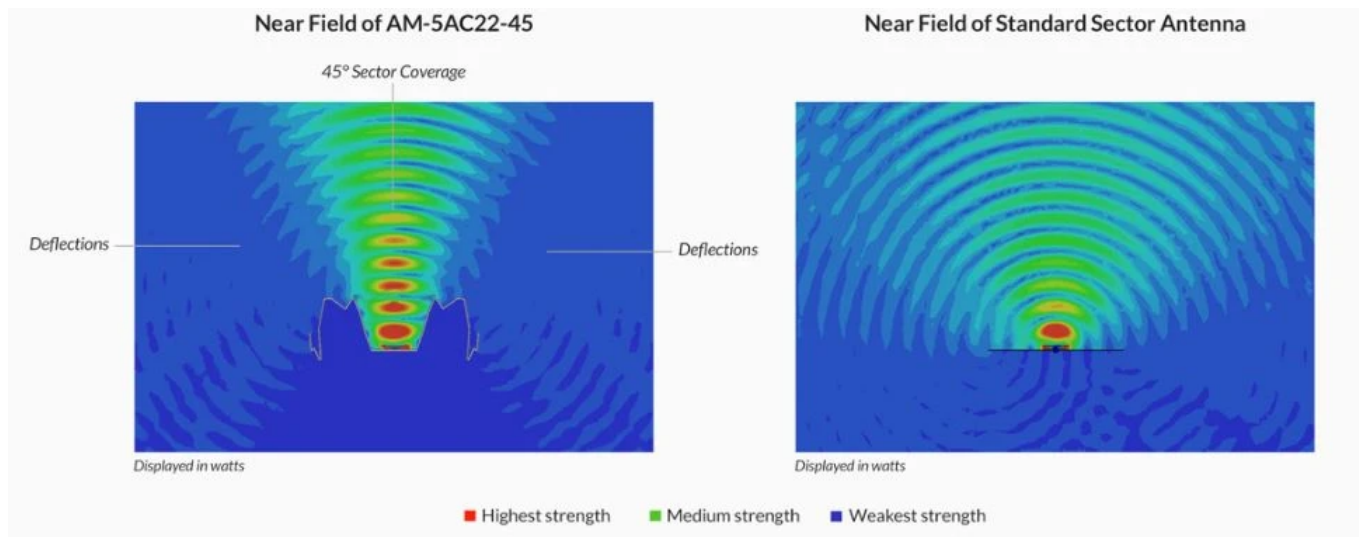

Interference resistance

The **airMAX ac** sector antennas have reduced side bars so that **they eliminate interference**.

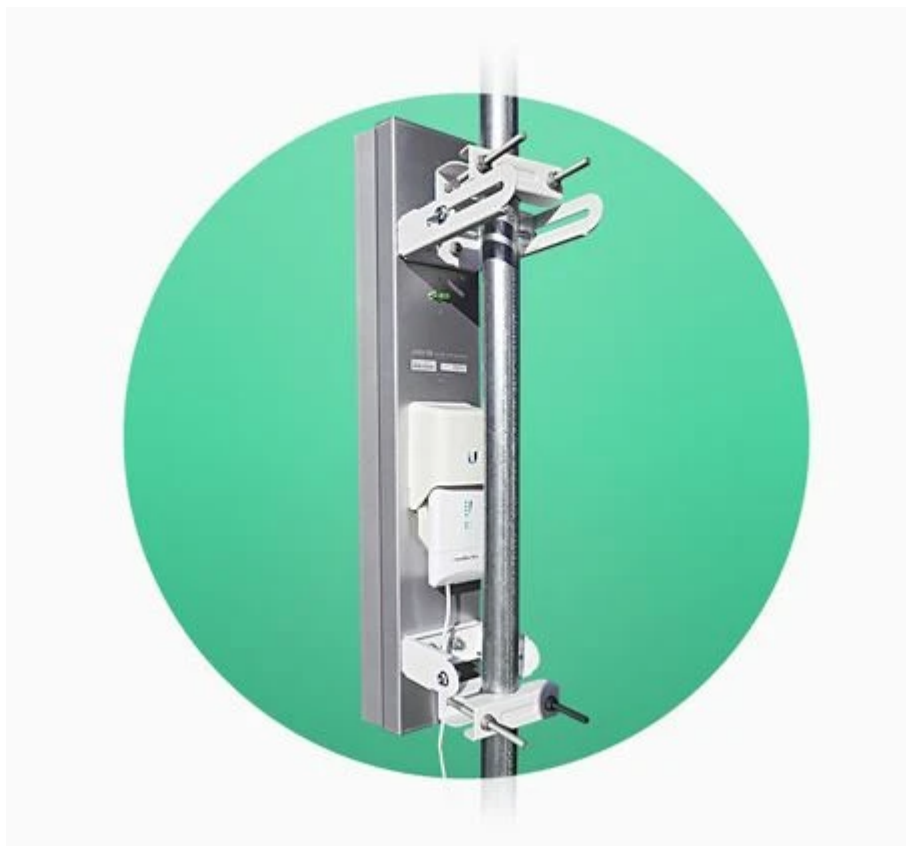

High transmission efficiency

Compare the airMAX ac sector antenna diagram, model AM-5AC22-45, with the standard sector antenna diagram and pay attention to the excellent interference resistance and transmission performance.

Rugged construction

The **airMAX ac** antennas are designed with a robust mechanical construction for outdoor use.

Plug and Play integration

Each ubiquiti airMAX ac sector antenna has a built-in **Rocket** handle, so no tools are needed to install the Rocket BaseStation.
