Price: **469.29 zł** gross / 381.54 zł net

Manufacturer: UBIQUITI

Referention number: DNXLEHSDNR

Full product description

Breakthrough dual-polarity design

The **Omni airMAX** antennas are the first of their kind to have a patented **dual-polarity design** of the omni type, it works in the **5GHz** band.

Powerful coverage in all directions

The Amo-5G10 from Ubiquiti is an omnidirectional antenna, which means that the waves it sends are propagating in all directions with the same intensity. Omni airMAX antennas provide **360° coverage**, **2x2 MIMO** performance in **LOS** (Line-of-Sight) or **NLOS** (Non-Line-of-Sight) applications.

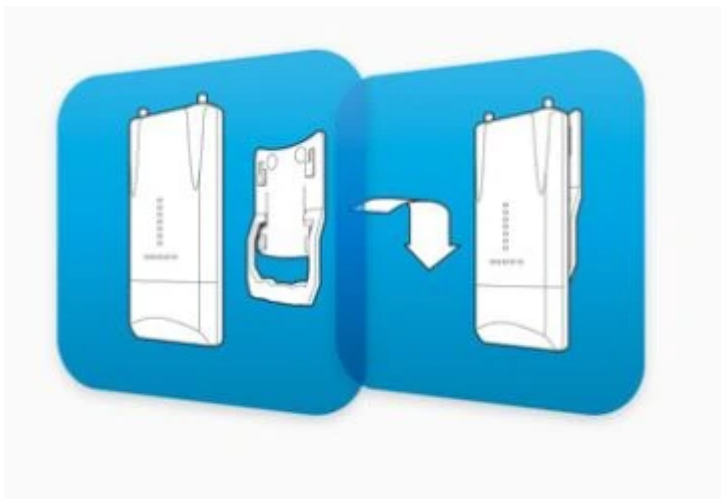

Durable construction

The omnidirectional **airMAX** antennas have a robust design for outdoor applications.

Plug and Play integration

Each airMAX antenna has a built-in **Rocket** handle, so no tools are needed to install the Rocket BaseStation.

Easy integration

Rocket M together with Ubiquiti AirMax Omni Amo-5G10 can create a powerful **omnidirectional base station with 360 degrees of coverage**. This integrated system gives computer network architects a wide range of design capabilities, combining flexibility and convenience. The Amo-5G10 antenna kit with Rocket M radio is ideal for cases where you need to cover a large area with signal and at the same time maintain **high network performance**.
