Full product description

Dual-band airMAX ac radio with Wi-Fi management

The Access point **AC Bullet** covers both **2.4** and **5 GHz** bands, supporting a wide range of frequency bands that work well for both short- and long-distance connections.

Extremely reliable throughput

The AC Bullet provides up to **300+ Mbps** actual TCP/IP throughput.

Resistance to long-term outdoor use

The rugged, weatherproof housing is resistant to harsh outdoor conditions.

A breakthrough in performance

AirMAX ac products offer lower latency, noise resistance, scalability and significantly **increased performance**.

Advanced software technology

Ubiquiti **airMAX** technology has been tested in millions of devices worldwide, demonstrating exceptional performance in outdoor environments. **The TDMA airMAX** protocol enables unprecedented scalability, high throughput and low latency in unlicensed, multipoint networks.

Plug and Play configuration

Connect **Ac-Bullet** to any existing antenna with a female N-type connector to create an airMAX base station.
