Price: **9,071.88 zł** gross / 7,375.51 zł net

Manufacturer: UBIQUITI

Referention number: DNXXGHJNKMRMMMO

Information:

Ubiquiti ENVR is a 3U enterprise NVR designed for large surveillance systems, supporting up to 70 4K cameras or 210 Full HD cameras. It offers 16 bays for 2.5/3.5" HDD/SSD drives with hot-swapping capability, which makes expansion easier and ensures long-term storage of recordings. Integration with UniFi Protect allows convenient management of IP cameras, while Ethernet and 10G SFP+ ports guarantee fast and stable data transmission. Power redundancy, two AC inputs, an 8-core ARM processor and 32 GB RAM ensure high performance and reliable operation in demanding installations.

Product features

Height	132 mm
LED indicators	Yes
Width	481.4 mm
Depth	480 mm
Power management	550 W
Rack mounting	Yes
Video recording speed modes	1080p
Power consumption (max)	410 W
Humidity measurement range	5 - 95%
Ethernet LAN (RJ-45) ports	1
Operating temperature (T-T)	-50 - 40 °C
Rack capacity	3U
Fiber ports quantity	2
Ethernet LAN data rates	10000 Mb/s
SSD capacity	0 GB

Internal memory	32000 MB
Wi-Fi	No
AC input frequency	50 Hz
AC input voltage	100 V
HDD 2 capacity	0 GB
Number of HDDs supported	16
Built-in processor	Yes
Product colour	Grey
Product weight	16600 g

Full product description

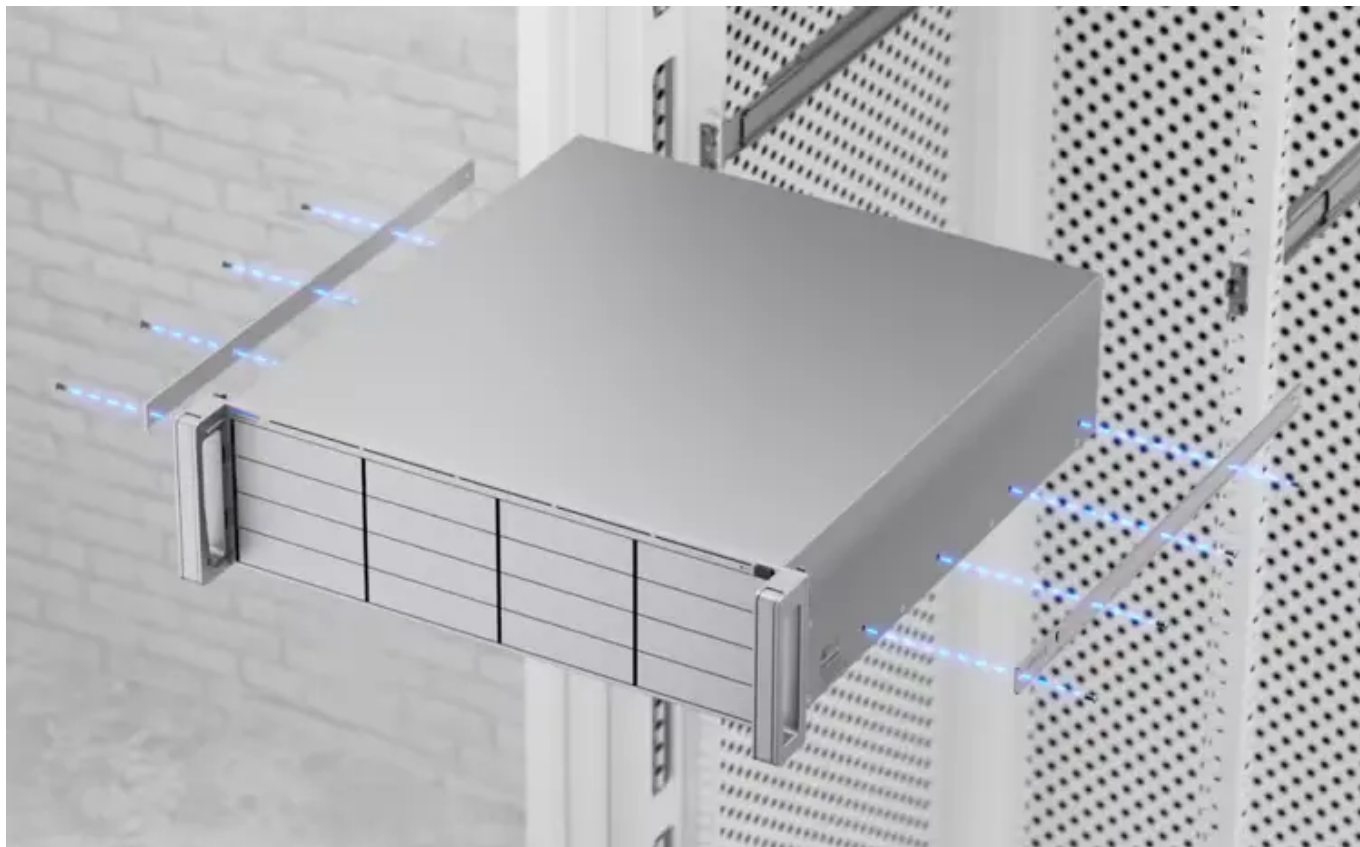

Ubiquiti ENVR | NVR 3U - Video Recorder for Business.

If you're looking for a surveillance device that can support a large number of 4K or Full HD video cameras, **the Ubiquiti ENVR** is the solution to meet your needs. This **Enterprise Network Video Recorder** offers advanced video protection features, capacity for **16 HDD/SSD drives**, and easy integration with UniFi Protect. With the ability to support up to **70 4K cameras** or **210 Full HD cameras**, this option is ideal for larger installations requiring reliable video storage and analysis

Support for a large number of cameras

The Ubiquiti ENVR supports up to **70 4K cameras** or **210 Full HD cameras**, making it a suitable choice for medium to large scale video installations. With this, you have the ability to monitor multiple areas in high definition, increasing the accuracy of detail in your recordings. **IP camera** support and management with **UniFi Protect** gives you the flexibility to integrate and grow your video infrastructure

Capacity and expandability

The device has **16 slots for 2.5/3.5" drives**, allowing the flexibility of selecting media with the appropriate capacity. High-capacity **HDD/SSD** (Hard Disk Drive / Solid State Drive) will provide enough space for multi-camera video recordings for a long time. The ability to swap drives without interrupting operation (hot-swappable) makes system expansion simple and fast.

Wide network connection options

Ubiquiti ENVR is equipped with **Ethernet** and **10G SFP** (Small Form-factor Pluggable) **ports**, providing high bandwidth for data transfer. This makes it easy to integrate with existing network infrastructure, such as **Switch UniFi** (switch - network switch), and ensure the stability of real-time video connections. The high data transfer rate enables uninterrupted transmission of **4K** quality video .

Performance and reliability

Designed for **high availability**, the Ubiquiti ENVR features power redundancy and two **AC** (alternating current) power ports to ensure continuous system operation. The built-in 8-core ARM® processor (ARM® - ARM-based processor architecture) and 32 GB of memory allow the DVR to run smoothly, even under heavy load. With this performance, the network video recorder ensures stable operation, regardless of the number of connected cameras.
