Full product description

EdgePower 54 V 72 W

EdgePower 54V 72W is a UNMS monitored and managed **54V DC** power supply with integrated battery backup. This product provides WISPs with an easy to install redundant **54 V** power supply, which includes a user interface for management and a simple 12 V backup charger with multiple 54 V outputs for small objects.

EP-54V-72W can also power the EdgeRouter™ ER-12, which works as a web gateway, as well as **EdgeSwitch ES-10XP**, which works as a PoE switch for the LAN. The EdgePower is also connected to the EdgeSwitch via Ethernet cable for management.

Management flexibility

EdgePower, designed for convenient management, allows you to configure and monitor the functions of the power supply in the graphical user interface. You can also use UNMS (Ubiquiti ® Network Management System) for remote management and SNMP is available to monitor EdgePower for issues that require attention.
