Full product description

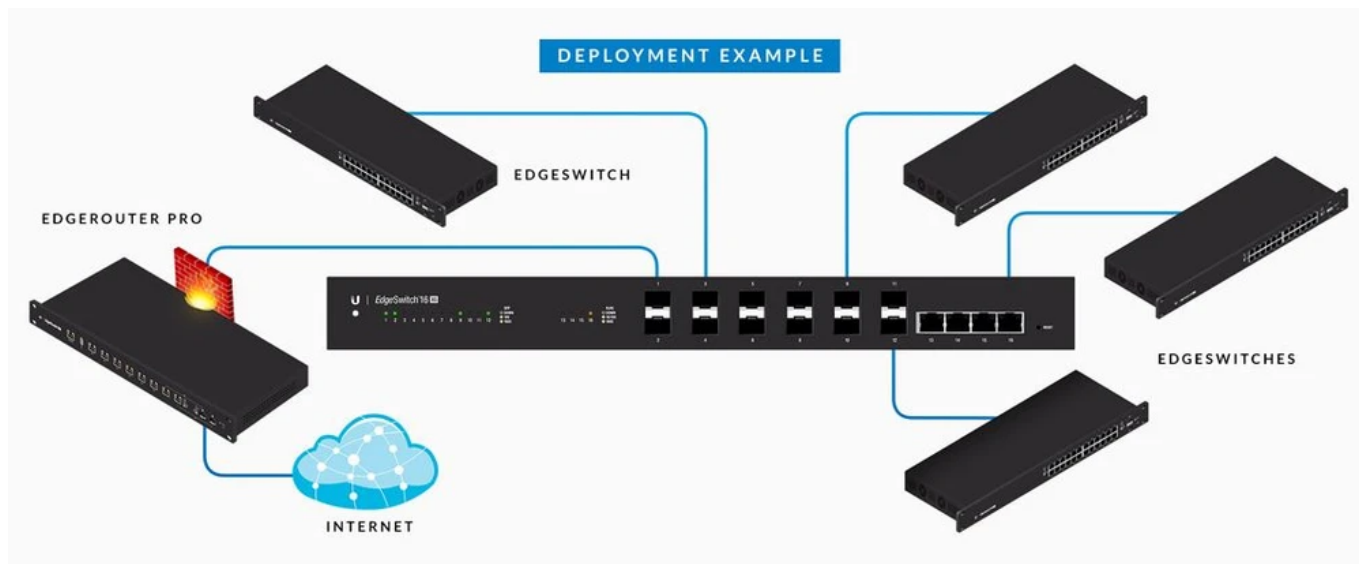

High throughput 10G lines

EdgeSwitch has **12 SFP+** ports and **four RJ45 10GBASE-T** ports that effectively deliver and aggregate data at **10Gbps**.

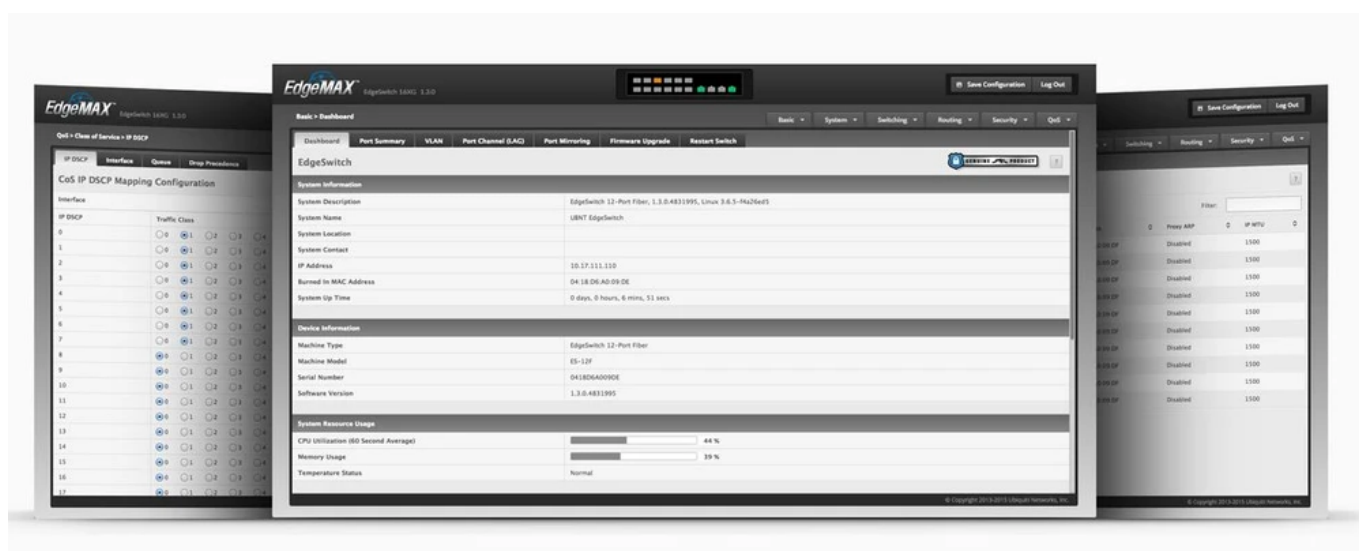

Powerful switch

EdgeSwitch offers the ability to transfer data to process traffic on all ports simultaneously at line-rate without losing packets. It has a total, non-blocking bandwidth of up to **160 Gbps**.

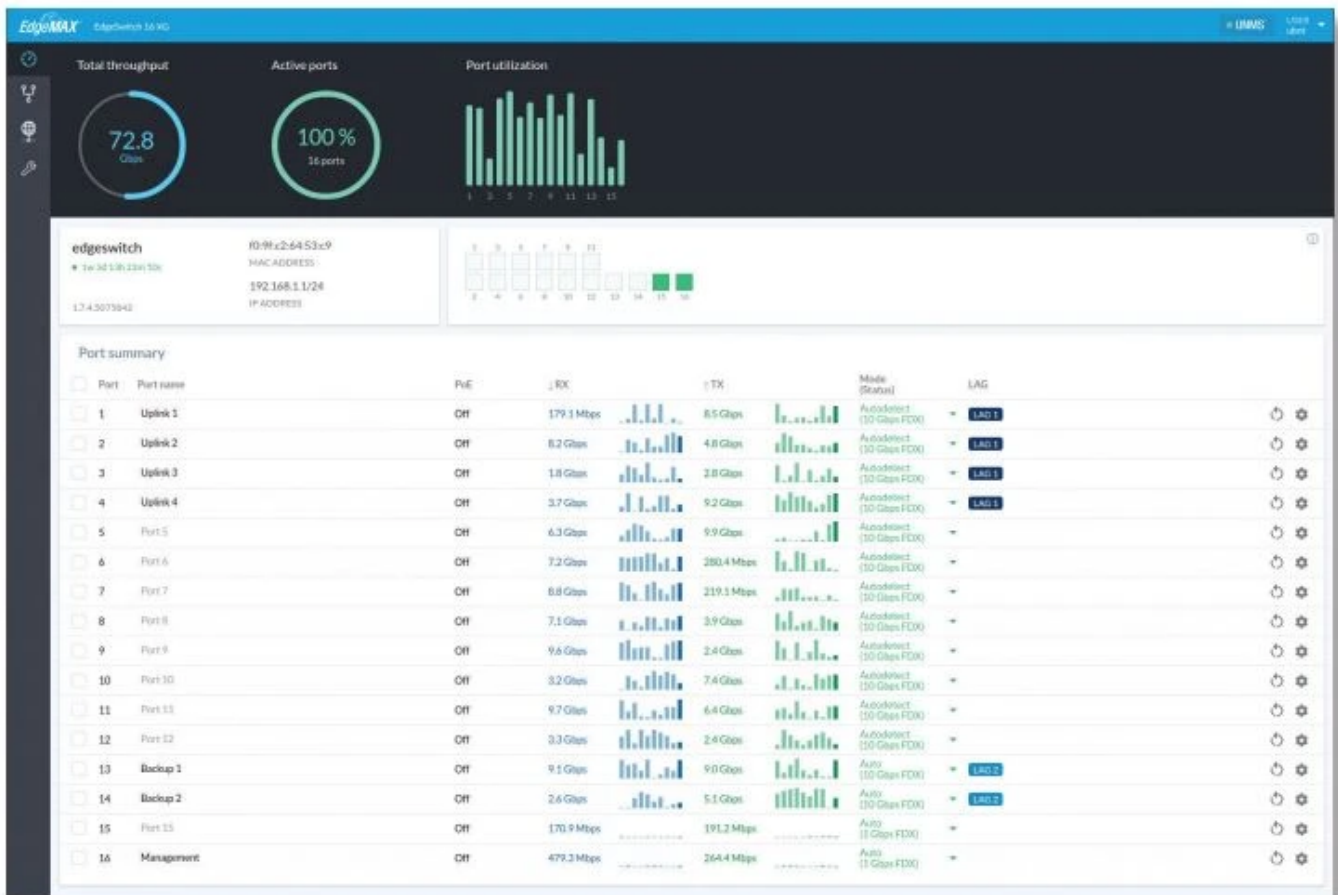

Advanced switch

EdgeSwitch uses a powerful operating system that provides advanced switching functions, including **VLAN tagging** and link aggregation, and limited Layer 3 functionality, including static routing and DHCP server functionality.

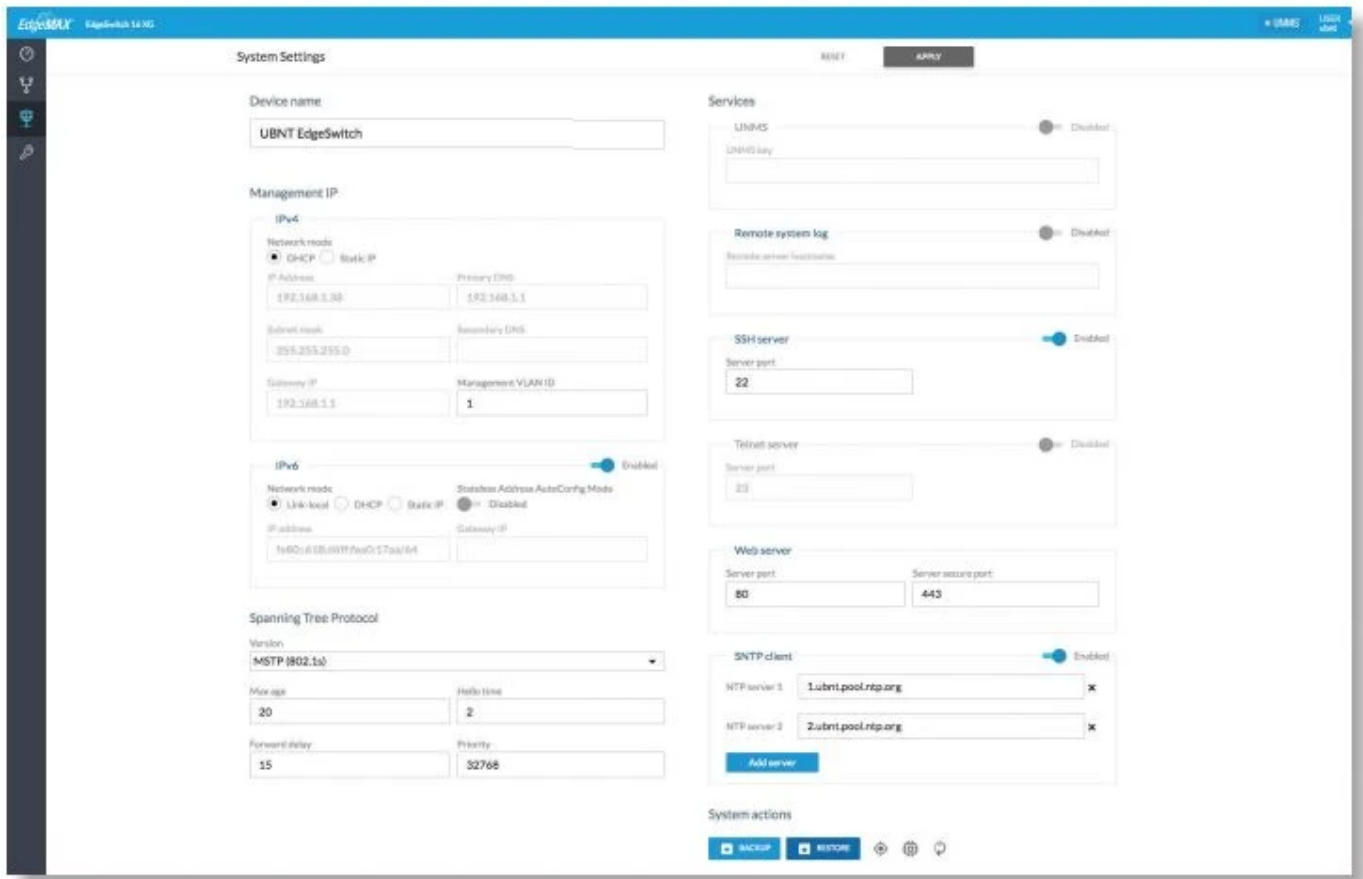

Comprehensive user interface

The EdgeSwitch configuration interface, designed for convenient management, allows administrators to configure and monitor switching functions in a graphical interface. For advanced users, the command line interface (CLI) is available through the **console port**, **telnet** and **SSH**.

Functions:

- MSTP/RSTP/STP
- VLAN, Private VLAN, Voice VLAN
- Link Aggregation
- DHCP Snooping, IGMP Snooping
- TACACS+, RADIUS, 802.1X, MAC Filtering, ACL
- DiffServ, CoS
- Static Routing
- DHCP server functionality

Rack-mountable construction

The metal case and included mounting brackets make it possible to mount the EdgeSwitch in a 19" rack.

Most important features

- Rack-mountable
- 12 SFP ports
- 4 10GBASE-T RJ45 ports
- Metal case
