Full product description

Managed PoE+ Gigabit switch with SFP

EdgeSwitch offers the ability to transmit and process traffic on all ports simultaneously without any packet loss. The 48-port models are capable of handling total non-blocking throughput up to **70 Gbps**.

Enterprise features

EdgeSwitch series switches offer a rich set of advanced **Layer 2** switching functions and protocols, and have **Layer 3** routing capabilities.

Fibre optic communication

Two SFP ports support links up to **1 Gbps**. For high throughput links, each model with 48 ports contains **the two SFP+** ports for links up to **10 Gbps**.

Comfortable PoE+ support

EdgeSwitch® has automatic IEEE 802.3af/at and 24V passive PoE detection to power multiple devices on the network.

Advanced user interface

The versatile user interface is easy to learn and allows administrators to configure and monitor functions in the graphical interface. For advanced users, a **command line interface** (CLI) is available via **telnet** and **SSH**.
