Manufacturer: UBIQUITI

Referention number: DNXGFNJLDRMLOH

Full product description

Conversion from fiber optic to ethernet signal

FiberPoE provides fiber optic connectivity to any PoE device.

Designed to withstand outdoor conditions

FiberPoE has an external, **weatherproof** enclosure with integrated load management.

Power supply versatility

FiberPoE allows for **separation of power supply** from standard Ethernet cables or a standard block of power terminals/cables. There are three ways to configure input and output power.

Fibre optic data transport

The use of **fibre optic cable** for data transmission significantly reduces failures from electrostatic discharge (ESD) and electromagnetic interference (EMI). Data integrity is also maintained for **transmissions above 100 meters**, which is a limitation for Ethernet networks via twisted-pair. FiberPoE Gen 2 supports **1G SFP** and power supply **24 V** or **50 V** from a DC or PoE cable.
