Product features

Antenna gain level (max)	19 gain
Product colour	White
Vertical beam width	30 °

Full product description

Modular construction

With different beam widths, insulating antennas are interchangeable and feature high performance flux patterns that are ideal for various applications. Used together with airFiber LTU and airMAX radio devices, these antennas provide **excellent performance** without losing gain.

Symmetrical horn antenna

The 30° and 45° versions offer **breakthrough options of scalability** for wireless systems. Unique radius performance and excellent coordinate location characteristics allow **greater sector density** than traditional sector technologies. The horn antenna provides **5GHz** connectivity.

Extraordinary flexibility

Tube antennas may be used with the following devices

- airFiber LTU AF-LTU
- IsoStation IS-5AC
- IsoStation IS-M5
- PrismStation PS-5AC
