

Ubiquiti HORN-5-60 | Sector antenna | airMAX Horn, 5GHz, 60 degrees

link to the product:

<https://www.batna24.com/gb/p/wi-fi-lte-antennas/ubiquiti-horn-5-60-sector-antenna-air-max-horn-5ghz-60-degrees>

Price: **300.38 zł** gross / 244.21 zł net

Manufacturer: UBIQUITI

Referention number: DNXGFNPKFRMMJJ

Product features

Antenna gain level (max)	16 gain
Product colour	White
Vertical beam width	60 °

Full product description

Modular construction

Insulation antennas are **replaceable** and are characterized by high performance beam streams, which allows to meet a number of demanding applications. The sector antenna operates at **5GHz**. In combination with the PrismStation 5AC or airFiber LTU, the system obtains maximum gain from the smallest area. The Sector Tube Antennas are designed to **increase colocation efficiency** without sacrificing gain.

Asymmetric tube antennas

The 60° and 90° versions have naturally dampened side mouldings and very low radiation. They offer the best front-to-back ratio and the lowest side arm radiation in the industry. Asymmetric tube antennas are ideal for installation in the cluster sector with **high location requirements**.

Versatility

Tube antennas can be used with the following radio equipment:

- airFiber LTU AF-LTU
- IsoStation IS-5AC
- IsoStation IS-M5
- PrismStation PS-5AC
