### Full product description

### Extralink Smartlife Smart Socket - your step towards a more convenient and energy-efficient life

The **Extralink Smartlife Smart Socket** is the perfect solution for those looking for convenient, secure and efficient ways to manage electrical devices in their home. With a wide range of features, such as **remote control, energy consumption monitoring and integration with popular smart home platforms**, this smart socket, combined with a Zigbee gateway, offers full control over home appliances. **Energy savings, safety and comfort** are just some of the benefits this product provides.

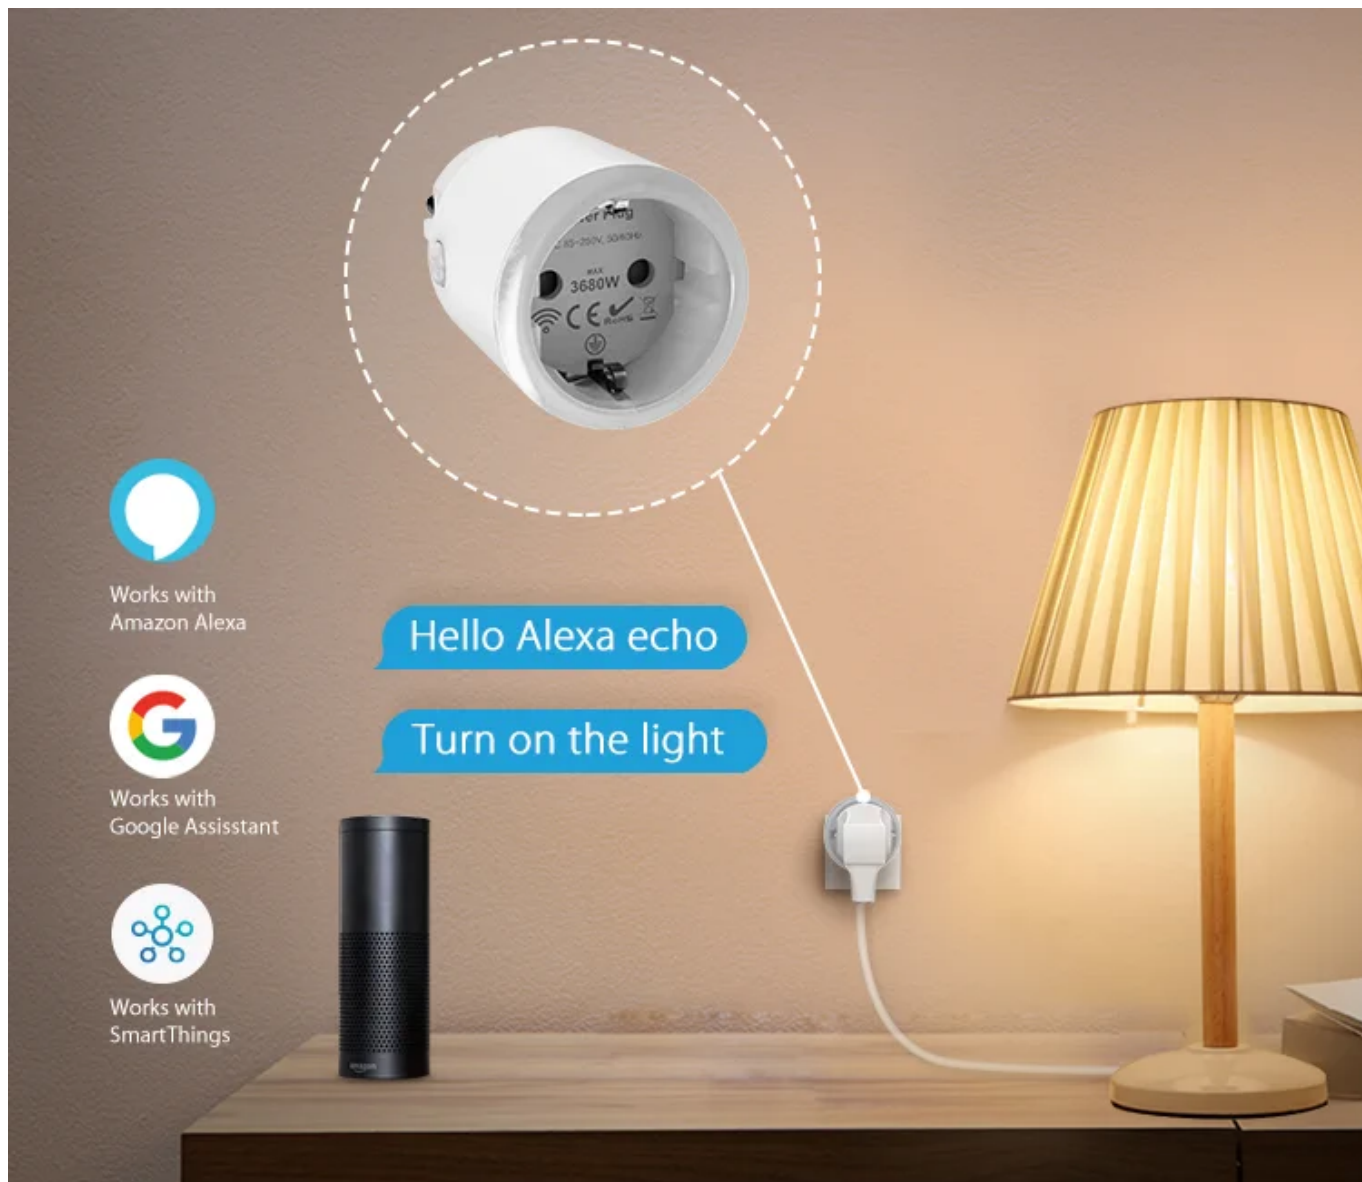

## Remote control from anywhere

The Extralink Smartlife Smart Socket allows you to control connected devices from anywhere, anytime. Thanks to compatibility with **TuyaSmart, Extralink Smart Life, Apple Home, Alexa and Google Home** apps, you can easily manage your home appliances from your smartphone or tablet. Such a solution significantly increases the comfort of your daily life, allowing you to remotely turn appliances on and off, even when you are away from home.

## Voice control - hands-free freedom

The Extralink Smartlife Smart Socket, via a Zigbee gateway, works with the most popular voice assistants such as Siri, Alexa and Google. Synchronization with smart home platforms allows you to easily issue voice commands, making home management even more intuitive. Regardless of your preferences, you can enjoy seamless operation without having to reach for your phone.

## Energy Consumption Monitoring and Notifications

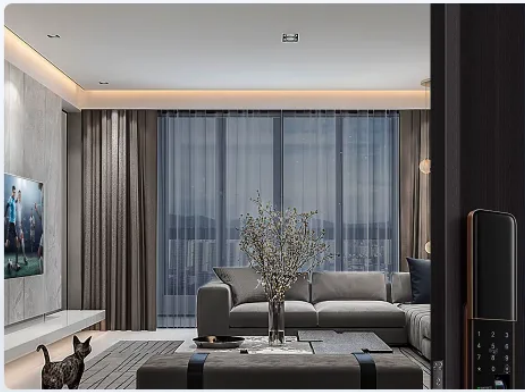

The integrated energy monitoring function allows you to analyze the power consumption of connected appliances. With access to detailed data, you can easily identify energy-consuming equipment and make informed decisions about their use. This practical solution allows you not only to better manage energy, but also to reduce electricity bills.

The socket is equipped with a function that reminds you when you exceed the set limit of energy consumption. This way you will always be up to date with the level of electricity consumption, allowing you to manage energy more consciously and make additional savings.

## Flexible work scheduling

The built-in timer and countdown function allow you to automatically turn the outlet on and off at specific times. So you can easily automate your home appliances, saving time and reducing energy consumption, for example, by setting a timer to turn off the water heater or turn on the lights.

### Timing function

Turn on the light at 18:30 every day

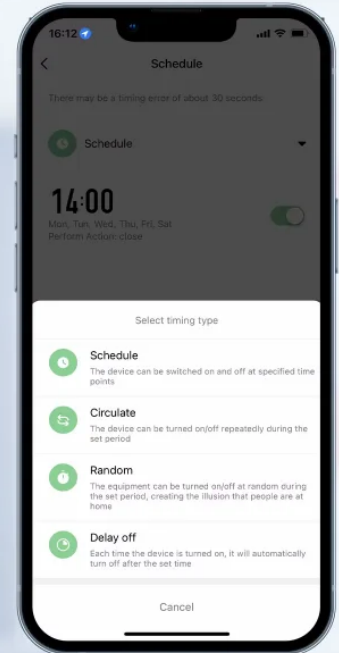

### Delay Off

Each time the TV is turned on,  
it will automatically turn off after 2 hours

### Cycle Timing

Turn on the air conditioning at 18:30,  
turn off it at 7:00 every day

## Safety for the whole family

With its parental lock function, the Extralink Smartlife Smart Socket provides extra security in the home. This safety feature protects children from accidental use of the device, which is especially important in homes with young children.
