Price: **5.06 zł** gross / 4.11 zł net

Manufacturer: UBIQUITI

Referention number: DNXEENQUEKSN

Full product description

Unlimited expansion possibilities

Ubiquiti mFi® management system is managed and monitored using the mFi controller software. The UniFi OS Console allows you to **create rules** that cause actions based on data from mFi sensors. For example, the light can be switched on when motion is detected and the fan is switched on when high temperature is detected. The mFi platform is compatible with devices from other manufacturers.

Modern magnetic sensor

It is designed to detect doors, windows, etc. being opened.

Simple configuration

Easily controlling devices and machines by using **sensors** - depending on schedule or conditions.
