Referention number: DNXMIILMOHSQP

Full product description

Integrated radio design

InnerFeed technology integrates the radio into the antenna radiator, so there is no need to run wires. The PowerBeam ISO is an extremely versatile device that provides high performance and innovative design at low cost.

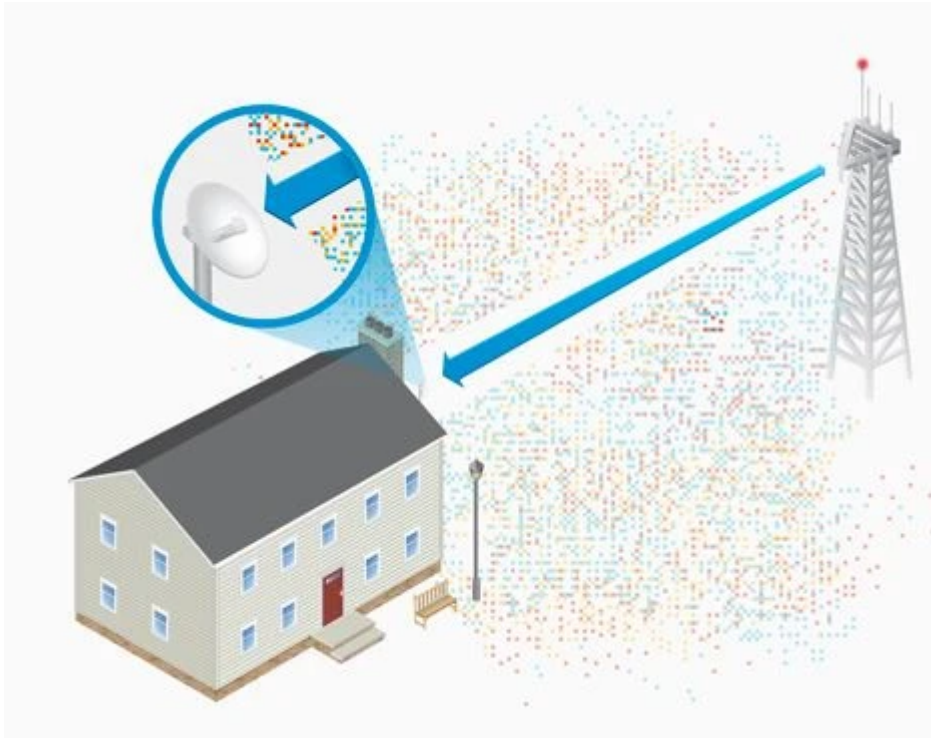

Plug-and-Play Installation

The PowerBeam device does not require any special tools, only one wrench is needed to mount it on the pole.

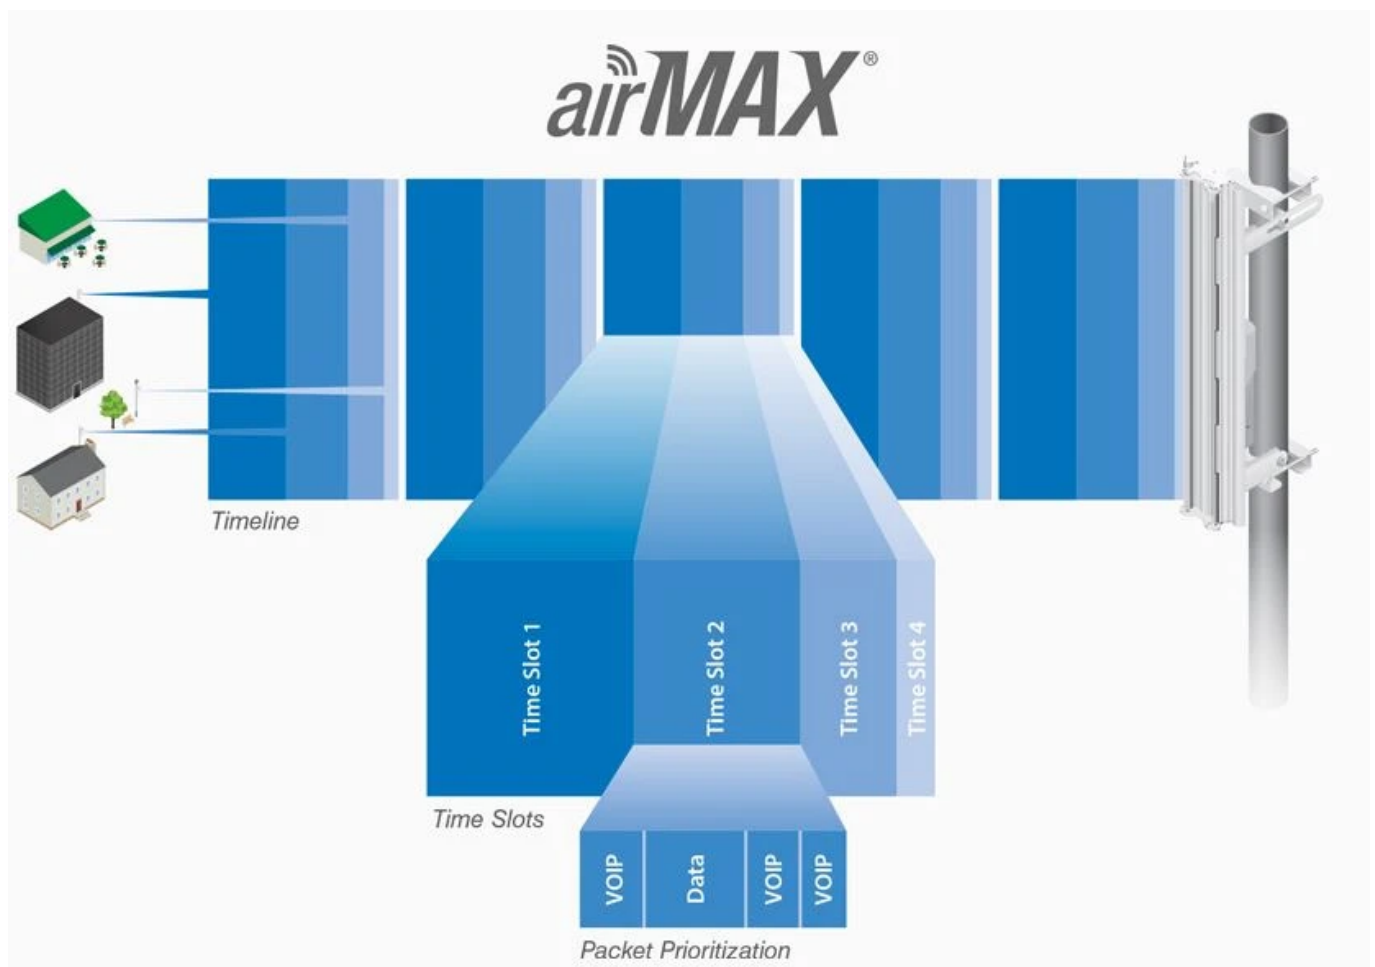

Amazing performance of Beam antenna

The **PowerBeam** form has the highest gain, and excellent beam targeting provides **the best performance** in high-noise environments.

Advanced software technology

Ubiquiti's **airMAX** technology has proven itself in millions of deployments worldwide, demonstrating exceptional performance in outdoor environments. **The TDMA airMAX protocol** enables unmatched scalability, high throughput and low latency in unlicensed, multipoint networks.

Protective cover

The PBE-RAD-400 is a radio cover that protects the device from harsh weather conditions. It is available as an optional accessory for the PowerBeam PBE-M2-400

Intuitive and versatile software

airOS is extremely intuitive software that requires no training to use. Behind the user interface is a powerful firmware architecture that enables **efficient, multipoint outdoor networking**.
